Preparation of Consolidated Financial Statements

The consolidated financial statements contained in this document, are also available on the group's website: www.mercedes-benz.co.za, and have been prepared under the supervision of Ms T Woodbridge (Chief Financial Officer and Executive Director - Finance and Controlling).

The consolidated financial statements have been audited in compliance with Section 30 of the Companies Act.

These consolidated financial statements were published on 30 April 2025.

Company Secretary's Certification

In terms of Section 88(2)(e) of the Companies Act of South Africa, as amended, I certify that, to the best of my knowledge and belief, Mercedes-Benz South Africa Limited has, in respect of the financial year ended 31 December 2024, lodged with the CIPC all returns and notices as are required of a public company in terms of the Companies Act and that all returns are true, correct and up to date.

Consolidated Financial Statements for the year ended 31 December 2024

Audit Committee Report

This report is provided by the audit committee appointed in respect of the 2024 financial year of Mercedes-Benz South Africa Limited.

The audit committee was nominated by the board of directors and appointed by the shareholder, in accordance with the King Code and Companies Act.

The audit committee met three times in the financial year ended 31 December 2024. The external auditor attended these meetings as an invitee and presented the formal reports, as required by the audit committee. All three members of the audit committee are independent, non-executive directors, with permanent guests from the internal finance and control functions. The audit committee complied with all of its responsibilities as set out in the Companies Act, King IV and the governing charter of the audit committee. The audit committee has complied with all of the aforementioned responsibilities for the financial year ended 31 December 2024. The audit committee, as per its mandate, provided, among others, independent oversight on the effectiveness of the group's assurance functions and services with particular focus on external assurance service providers, internal audit and controls and the finance function in general.

1. Mandate of the audit committee

At MBSA, the audit committee is a statutory body established under section 94 of the Companies Act.

Its mandate is to ensure adherence to sound governance, accounting and auditing standards. The committee oversees the implementation of controls, risk management and accounting policies, while monitoring market influences on business operations.

It ensures that MBSA's assets are safeguarded and that financial statements comply with the Companies Act and IFRS® Accounting Standards.

2. Internal controls

The audit committee is satisfied with the design and implementation of internal controls, as supported and confirmed by the management of the group. The design, implementation and execution of internal controls are monitored in order to ensure that any weaknesses are addressed to mitigate material loss, fraud or errors.

The audit committee considered the reports from the information technology department which could have an impact on the control environment at the group. It is satisfied that management action plans are in place in relation to information technology controls.

The audit committee considered the reports from the MBAG corporate internal audit function and is satisfied with management action plans in response thereto. The audit committee is satisfied with the effectiveness of the internal audit arrangements in place.

3. External auditor

In accordance with group rotation requirements, 2023 was the final year with KPMG as the independent external auditors.

The audit committee considered and assessed in 2024 the suitability of PWC Inc. and Mr P Vermeulen, as per the requirements of the JSE, with regard to their appointment in terms of the Audit Committee Charter and the Companies Act. The audit committee is satisfied that the appointment of the external auditor, Mr P Vermeulen, complies with the legislative and regulatory requirements and the audit committee is satisfied with his independence. Adequate policies and controls are in place to address the provision of non-audit services by the external auditor to ensure compliance with legislation and other corporate governance guidelines or regulations. The audit committee considered the audit quality controls based on the Independent Regulatory Board for Auditors reports as well as the relevant JSE requirements.

Non-audit services were reviewed, as approved in the non-audit services catalogue of MBAG, and did not become significant to call into question the independence of the external auditor or the firm, PWC Inc.

The audit committee, in consultation with executive management, agreed to the terms of the engagement. The audit committee approved and reviewed the fees proposed by the external auditor, taking into consideration such factors as the timing of the audit, the extent of the work required and the scope. It further, on an ongoing basis, reviewed the scope, independence and impartiality of the external auditor. PWC Inc. has been the independent auditors of MBSA for the first year.

There were no reportable irregularities identified or reported by the external auditor to the audit committee.

4. Compliance with legal and regulatory requirements

The audit committee is satisfied that, to the best of its knowledge, all regulatory and legislative requirements with regard to its function, duties and obligations has been complied with.

5. Key audit matters

The audit committee performs the duties laid upon it by Section 94(7) of the Companies Act by holding meetings with the key role players on a regular basis and by the unrestricted access granted to the external auditors.

The audit committee noted and considered the key audit matters set out in the report of the independent auditor included in these consolidated annual financial statements. The audit committee is satisfied with the appropriateness of the key audit matters reported on by the independent auditor.

Audit Committee Report

6. Consolidated Financial Statements

The audit committee is satisfied that, to the best of its knowledge, the consolidated financial statements for the financial year ended 31 December 2024 fairly reflect the financial position and results of the group.

The pro-active monitoring, which was completed by the JSE was considered. The result of such monitoring was presented to the audit committee, which satisfied itself that the findings and focus areas were adequately addressed in the consolidated financial statements for the year ended 31 December 2024 and that all of the debt and specialist securities listing requirements were complied with.

7. Accounting practices

The audit committee is satisfied that the consolidated financial statements have been prepared in accordance with relevant accounting practices, the MBSA accounting policies, and are fully compliant with IFRS® Accounting Standards.

The audit committee is satisfied that the group has appropriate financial reporting procedures and that these procedures are operating and being monitored.

8. Effectiveness of finance function

The audit committee considered and satisfied itself with the appropriateness of the qualifications, expertise, experience, effectiveness and performance of the financial director and the finance function.

On behalf of the audit committee:

Consolidated Financial Statements for the year ended 31 December 2024

Directors' Report

The directors are pleased to present their report, which forms part of the consolidated annual financial statements of the group for the year ended 31 December 2024.

1. Nature of business

The group holds a manufacturing and distribution agreement from MBGAG and MBAG for the importation, assembly and distribution of Mercedes-Benz, Mercedes-AMG and Mercedes-Maybach product ranges. MBFS, a subsidiary of MBSA, provides financing and insurance solutions over MBGAG products.

A simplified group organogram has been provided, additional information on the group's operating entities is available on request.

The group's business can be best described, in general, as follows:

1.1 Financial services

These operations provide financing and insurance solutions over MBGAG products.

1.2 Wholesale and retail vehicle operations

These operations market and sell vehicles, value-added products and spare parts in the product portfolio, primarily through the authorised agent and dealer network.

1.3 Manufacturing and component exports operations

These operations, located in East London, manufacture Mercedes-Benz C-Class sedans for the local and selected international markets.

In addition, this facility also produces components for export to the international market.

1.4 Other operations

The group provides the following administrative services and other operations:

- Non-core operations and functions
- Expat cost recoveries
- Service level agreements
- IT recoveries

The Mercedes-Benz IT hub, which is located in East London, South Africa, provides IT related services to MBAG and its subsidiaries.

2. Financial results for year under review

Full details of the financial position, results of operations and cash flows of the group are set out in these consolidated financial statements.

	2024	2023	Difference year	Change year on

Directors' Report

3. Availability of MBSA separate annual financial statements

The MBSA separate annual financial statements have been prepared and signed on 30 April 2025.

The MBSA separate annual financial statements have been prepared in accordance with IFRS® Accounting Standards, the requirements of the Companies Act and the company's independent auditors, PWC Inc., have expressed an unqualified opinion thereon.

The directors of the group are responsible for the controls over and the security of the website and, where applicable, for establishing and controlling the process for electronically distributing annual reports and other financial information to shareholders and to the CIPC.

4. Corporate governance

The directors have adopted the principles as provided for in King IV for the financial year 2024. The principle summary King IV report is published on the website of MBSA, [//www.mercedes-benz.co.za/passengercars/brand/corporate.html](http://www.mercedes-benz.co.za/passengercars/brand/corporate.html).

The board is satisfied that there is an appropriate mix of knowledge, skills, experience, diversity and independence.

Dr D Peterson is the company secretary of Mercedes-Benz South Africa Limited. The board is satisfied with the competence, qualifications and experience of the company secretary. The board has access to the company secretary and such arrangements are effective.

Mr D van der Bank is appointed as the debt officer. The directors considered and satisfied itself on the competence, qualifications and experience of the debt officer on appointment.

The board has a policy in place for the management of conflict of interests, which is the Integrity Code of the group. This Integrity Code is available on the website of the company, [//www.mercedes-benz.co.za/passengercars/brand/corporate.html](http://www.mercedes-benz.co.za/passengercars/brand/corporate.html). Board members submit annually, or alternatively as and when required, their respective declarations concerning personal interests and is required at each meeting to indicate whether a conflict of interest may arise with a matter to be discussed. The board can confirm that there are no material and enduring personal conflicts of interest noted from any member.

5. Directorate

The directors in office at the date of approval of these annual financial statements are as follows:

Directors	Designation	Changes
Mr A Brand**	Executive (Chief Executive Officer)	
Ms T Woodbridge	Executive (Chief Financial Officer)	
Mr AM Kgotle	Executive

* Member of the audit committee.

**Member of the social and ethics committee.

*** Member of the audit committee and social and ethics committee.

**** All resignations are as a result of the affected directors taking up different positions within the greater MBSA Group.

Active directors' curriculum vitae's are published on the website of Mercedes-Benz South Africa Limited, [//www.mercedes-benz.co.za/passengercars/brand/corporate.html](http://www.mercedes-benz.co.za/passengercars/brand/corporate.html).

Attendance register of directors' meetings is available in the King IV report.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Directors' Report

6. Going concern

The consolidated financial statements for the year ended 31 December 2024 have been prepared on a going concern basis, which assumes that the group will be able to meet its obligations for the foreseeable future and for at least 12 months from the date of this report. The group recognised a net profit after tax of R 2 783 million (2023: R 4 447 million) for the year ended 31 December 2024 and, at that date, had an equity-to-asset ratio of 47.84% (2023: 42.69%).

Management believes that the group will be able to meet all its obligations for at least the next 12 months from the date of this report. Management further believes that, proceeds received during 2025 will be sufficient to meet the repayment requirements. Management has performed forecasts and based on these forecasts the expectation is that the group will continue to be profitable for the 2025 financial year. The company and group will therefore be solvent and liquid for at least the 12 months from the date of this report.

Management has the full support of the holding company, MBAG, for its operations. This is reviewed annually and additional support is provided, if required. To this extent, MBGAG issued a guarantee with regards to the notes issued under the DMTN programme.

7. Events after the reporting period

At the date of finalisation of the financial statements there were no material events that occurred subsequent to the reporting date that required adjustments to the amounts recognised in the financial statements.

Bonds and bank loans issued and redeemed

Subsequent to year end, no bonds and bank loans have been issued.

American tariffs

In April 2025, the USA announced new tariffs on goods imported from outside the USA, including vehicle imports. MBSA operates a manufacturing plant producing C-Class models for the global market, including the USA, is actively assessing the potential effects of these tariffs on the business. The current assessment is ongoing, with efforts being coordinated both locally and by the holding company, MBAG.

As at the reporting date, it is not possible to quantify the financial impact of these tariffs.

Director changes

Mrs S Sardien resigned with effect from 30 April 2025 and Mr F Seidler was appointed with effect from 1 May 2025.

Approval of consolidated financial statements

The consolidated financial statements set out on pages 22 to 81, which have been prepared on the going concern basis, were approved and authorised by the audit committee, as per the audit committee charter, on 30 April 2025, and were signed on its behalf by:

Executive director: Manufacturing

Independent auditor's report

To the shareholder of Mercedes-Benz South Africa Limited

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Mercedes-Benz South Africa Limited (the Company) and its subsidiaries (together the Group) as at 31 December 2024, and its consolidated financial performance and consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa.

What we have audited

Mercedes-Benz South Africa Limited's consolidated financial statements set out on pages 22 to 81 comprise:

- the consolidated statement of financial position as at 31 December 2024;
- the consolidated statement of profit or loss and other comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the financial statements, including material accounting policy information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the Independent Regulatory Board for Auditors' *Code of Professional Conduct for Registered Auditors* (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)*.

Our audit approach

Overview

Final materiality

R467,302,500, which represents 0.75% of total consolidated Revenue (which consists of (i) revenue from sale of vehicles and related services (ii) interest received (iii) legal loss recoveries and (iv) non-interest revenue, with the last 3 being from financial and other services.) Refer to the disclosure note 4 of the financial statements

Group audit scope

In establishing the Group audit scope, we have identified two components which were considered to be significant. These components were subject to full scope audits. One component was identified as a non-significant component and included to perform an audit of one financial statement line item. Other components identified were deemed to be inconsequential from an audit perspective. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit work at those components to be able to conclude whether sufficient appropriate audit evidence had been obtained as a basis for our opinion on the consolidated financial statements as a whole.

Key audit matters

Valuation of “maintenance and service contracts” (Contract liabilities)

Recoverability of loans and advances to customers (Expected credit loss)

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where the Directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

In terms of the IRBA Rule on Enhanced Auditor Reporting for the Audit of Financial Statements of Public Interest Entities, published in Government Gazette Number 49309 dated 15 September 2023 (EAR Rule), we report final materiality and group audit scope below.

Final materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the final materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the consolidated financial statements as a whole.

	Consolidated financial statements
<i>Final materiality</i>	R467,302,500
<i>How we determined it</i>	0.75% of total consolidated Revenue (which consists of (i) revenue from sale of vehicles and related services (ii) interest received (iii) legal loss recoveries and (iv) non-interest revenue, with the last 3 being from financial and other services.) (Refer to the disclosure Note 4 of the financial statements).
<i>Rationale for the materiality benchmark applied</i>	We have identified total consolidated Revenue as the most appropriate basis because, in our view, it is the measure against which the performance of the Group is most commonly measured by users of the consolidated financial statements and is a generally accepted materiality benchmark for similar entities. We chose 0.75% which is consistent with quantitative materiality thresholds used for similar companies.

Group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

We considered the Group's organisational, legal, consolidation structures and its financial reporting processes when identifying components for purposes of planning and performing audit procedures. For purposes of our Group audit scope, we considered a component to be a single reporting unit within the Group being consolidated. Within the context of the audit, this amounted to each separate legal entity.

In establishing the Group audit scope, based on our Group risk assessment we determined the type of work that needed to be undertaken on the financial information of the components to identify risks of material misstatement. We then identified how the nature and size of the account balances at the components contributed to those risks and determined which account balances required an audit response. We have identified two components which were considered to be significant.

Based on our scoping procedures described above, we have scoped in the two significant components for full scope audits. One component was identified as a non-significant component and included to perform an audit of one financial statement line item. The remainder of the components were considered inconsequential and based on our risk assessment, they do not individually nor in the aggregate, present a reasonable possibility of material misstatement to the Group financial statements taken as a whole.

We determined the type of work that was needed to be performed by us, as the auditors of the Group, or component auditors of the Group auditors operating under our instructions. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit work at those components to be able to conclude whether sufficient appropriate audit evidence had been obtained as a basis for our opinion on the consolidated financial statements as a whole.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In terms of ISA 701 *Communicating key audit matters in the independent auditor's report* / the EAR Rule (as applicable), we are required to report key audit matters and the outcome of audit procedures or key observations with respect to the key audit matters, and these are included below.

Key audit matter	How our audit addressed the key audit matter
<i>Valuation of "maintenance and service contracts" (Contract liabilities)</i> <i>Refer to following disclosures in the financial statements as it relates to this key audit matter:</i> <i>Note 3.3.1: Material accounting estimates, judgements and assumptions, under subheading, Revenue from contracts with customers; and</i>	Our audit procedures performed consisted of the following: (i) We evaluated the design and implementation of the control environment in relation to the accounting of revenue sales transactions to understand how revenue is separated into its separately identifiable performance obligations.

Key audit matter	How our audit addressed the key audit matter
- Note 25: Contract liabilities; in the consolidated financial statements. As at 31 December 2024, the consolidated statement of financial position included contract liabilities, which consists of “maintenance and service contracts” balance of R2,605 million (2023: R3,096 million). The group sells motor vehicles with a maintenance and service plan to customers as separate performance obligations. Whilst the sale of the motor vehicle is recognised immediately as revenue, the maintenance and service revenue is recognised as contract liabilities and released into revenue over the lifetime of the contract. The group is exposed to risk that the contract liability for maintenance and service contracts are incorrectly calculated, as the statement of financial position account composition depends on complex and subjective judgements relating to future costs that needs to be covered based on the contractual promise made to customers. Due to the key assumptions that affect the group's estimate for maintenance and service obligations, we considered the valuation of the maintenance and service contracts as a matter of most significance due to: - The level of estimation uncertainty in determining the appropriate amount to be recognised as well as the quantum of the amounts involved. - The significant audit effort required in assessing the appropriateness of evidence obtained in support of fulfilling the underlying contractual arrangements render this as a key audit matter.	(ii) We obtained a detailed listing (administrative report) from management. The administrative report amongst other information includes cumulative data for all premiums, total claim expenses, non-financial data such as contract duration period, mileage covered at each maintenance and service intervals. (iii) The aggregate amount of the “Fund build-up” (i.e. total premiums collected less expenses and claims paid) as per the above referred detailed report were reconciled to the accounting records (general ledger account) and noted no material difference. (iv) Input testing was performed by tracing sampled items from the above referred detailed listing to the respective supporting documents, i.e. (a) we inspected claims amount to the supporting document(s) issued by the service provider(s); (b) premiums collected to the contractual arrangement and to the price list prepared by the entity for respective derivatives and models; (c) traced mileage data to the information captured on the respective service interval job card; and (d) agreed coverage period to the signed contractual arrangement.

Key audit matter	How our audit addressed the key audit matter
The accounts related to the maintenance and service obligation are among the most significant in the financial statements.	There were no significant exceptions noted. (v) We evaluated samples of sales transactions to understand their separately identifiable performance obligations for service and maintenance contracts, and the apportionment from the sales transaction of the contract liability performance obligation. No significant exceptions were noted. (vi) In addition, we utilised our in-house subject matter experts to assist in evaluating the reasonableness of key assumptions applied and methodology, such as future cost methodology which includes ultimate loss ratios and utilisation curves, for estimating remaining costs and deferred revenue. Thereafter, our independently determined estimated amount was compared to those calculated by management. No significant exceptions were noted. We evaluated whether the methodology applied by management in determining the provision for service and maintenance contracts is aligned to IFRS 15 by assessing whether the recognition criteria was met. (vii) We have also reconciled the data used by our in-house subject matter experts to the data used for input testing, with no material variance noted.

Key audit matter	How our audit addressed the key audit matter
	(viii) We have evaluated the appropriateness of the related disclosures in accordance with the IFRS reporting framework.
<i>Recoverability of loans and advances to customers (Expected credit loss)</i> <i>Refer to following disclosures in the financial statements as it relates to this key audit matter:</i> <i>Note 3.3.1 Material accounting estimates, judgements and assumptions; under subheading, Allowance for impairment of loans and advances to customers;</i> <i>Note 14: Loans and Advances to Customers; and</i> <i>Note 32.3.2: Credit Risk in the consolidated financial statements.</i> The group is exposed to significant credit risk from loans and advances to customers. This stems from the group's retail portfolio financing ("instalment sale receivables" and "finance lease receivables"), as well as wholesale vehicle financing receivables. As at 31 December 2024, the consolidated statement of financial position included loans and advances balance of R9,639 million (2023: R10,525 million).	Our audit procedures performed consisted of the following: (i) We obtained an understanding of the controls relevant to our audit over the expected credit loss assessment and evaluated whether the controls were appropriately designed and were operating effectively throughout the year. Using our actuarial expertise, we performed the following audit procedures: (ii) We obtained an understanding of the ECL model methodology applied and compared the model performance against actual historical credit experience and industry practice and the results of model monitoring performed. This assessment included back-testing of actual losses against predicted losses and re-performance of selected tests within the model monitoring. We noted no material matters for further consideration. (iii) We recalculated the ECL model components (PD, EAD and LGD) to assess the accuracy of the modelled outputs. We noted no material differences.

Key audit matter	How our audit addressed the key audit matter
The group regularly estimates the risk of default on advances to customers, by taking into account historical loss experience, the size and composition of certain portfolios, current economic events and conditions and the estimated fair values and adequacy of collaterals. Changes to the estimation and assessment of these factors influence the allowance for credit losses with a resulting impact on the group's profit or loss. • The group's expected credit loss (ECL) model includes certain key estimates, judgements and assumptions such as: • the probability of default ("PD") which is a measure of the expectation of how likely the customer is to default; • the exposure at default ("EAD") which is the expected amount outstanding at the point of default; and • the loss given default ("LGD") which is the expected loss that will be realised at default after considering recoveries through collateral and guarantees. The adequacy of impairments of loans and advances to customers is assessed through the ongoing review of the quality of credit exposures. For amortised cost advances, impairments are recognised through the use of the allowance account method and an impairment charge in the consolidated statement of profit or loss and other comprehensive income. We considered the recoverability of loans and advances to customers to be a matter of most significance to the current year audit due to:	(iv) We evaluated the reasonableness of the SICR ("significant increase in credit risk") classifications by independently applying the assumptions in management's model to the data and noted that these fell within an acceptable range. (v) We reviewed the SICR thresholds applied and the resultant transfer into Stage 2 for SICR. This assessment included benchmarking the volume of up-to-date accounts transferred to Stage 2 to historical trends of movements from performing into arrears and forward-looking expectation of default risk. No material differences were noted. We further performed the following procedures: (vi) We agreed a sample of data elements used as inputs to the ECL models to relevant source documentation and noted no material differences. (vii) We evaluated the appropriateness of the related disclosures in accordance with IFRS Accounting Standards.

<i>Key audit matter</i>	<i>How our audit addressed the key audit matter</i>
• The high level of estimation uncertainty and significant judgment in determining the appropriate amount to be recognised, as well as the significant amounts involved, this was identified as a key audit matter requiring substantial audit effort; and • The magnitude of the recoverability of loans and advances to customers to the customers recognised in relation to the consolidated financial statements.	

Other information

The Directors are responsible for the other information. The other information comprises the information included in the document titled "Mercedes-Benz South Africa Limited Consolidated Annual Financial Statements for the year ended 31 December 2024" and the document titled "Mercedes-Benz South Africa Limited Annual Separate Financial Statements for the year ended 31 December 2024", which include(s) the Directors' Report, the Audit Committee Report and the Company Secretary's Certification as required by the Companies Act of South Africa. The other information does not include the consolidated or the separate financial statements and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the consolidated financial statements

The Directors are responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the Directors determine is necessary to enable the

preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements

represent the underlying transactions and events in a manner that achieves fair presentation.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence, regarding the financial information of the entities or business units within the Group, as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

Audit tenure

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that PricewaterhouseCoopers Inc. has been the auditor of Mercedes-Benz South Africa Limited for 1 year(s).

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

1. Corporate information

Reporting entity	Mercedes-Benz South Africa Limited is the holding company of the Mercedes-Benz South Africa group
Reporting period	Financial year ended 31 December 2024
Domicile	The Republic of South Africa
Authorised by the board of directors	30 April 2025

2. Basis of preparation

These accounting policies, and those included in the notes, represent a summary of the material accounting policy elections of the group.

These consolidated financial statements have been prepared in accordance with:

- IFRS® Accounting Standards, SAICA Financial Reporting Guides and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, International Accounting Standards Board ("IASB") and Reporting Interpretations Committee ("IFRIC") standards and interpretations;
- the JSE Debt and Specialist Securities Listing Requirements and the Companies Act;
- the principle of going concern; and
- the historical cost and fair value basis of accounting, where applicable.

These consolidated financial statements have been prepared in accordance with the requirements of IFRS® Accounting Standards on a basis consistent with that of the previous year.

These consolidated financial statements can be obtained from the company secretary at the company's registered address. Separate financial statements for the company are also prepared and can be obtained at the company's registered address.

2.1 Functional and presentation currency

The functional currency of Mercedes-Benz South Africa Limited group and the presentation currency of the group is South African Rand ("Rand").

2.2 Rounding policy

All amounts in the consolidated financial statements are presented in Rand million ("R mil").

The group has a policy of rounding in increments of R 500 000. Amounts less than R 500 000 will therefore round to R nil and are presented as a dash.

2.3 Foreign currency translation

Procedures followed to translate to presentation currency

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

At the end of the reporting period:

- monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date;
- non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined; and
- non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

Foreign exchange gains or losses are recognised in profit or loss unless they relate to qualifying cash flow hedges, in which case they are recognised in other comprehensive income to the extent that the hedges are effective.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

3. Presentation of financial statements

3.1 Group accounting

Group structure

Holding company	Mercedes-Benz South Africa Limited
Subsidiaries	Mercedes-Benz Financial Services South Africa Proprietary Limited Koppieview Property Proprietary Limited

Consolidation

Subsidiaries are entities controlled by the group. Control is achieved when the group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The group also considers the following facts and circumstances in assessing whether it has power over an entity:

- rights arising from contractual arrangements; and
- the group's voting rights and potential voting rights.

The group reassesses whether or not it controls an entity if facts and circumstances indicate changes to the elements of control.

Subsidiaries - recognition and measurement

Business combinations are accounted for using the acquisition method. When the group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the group's accounting policies as well as the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Subsidiaries are consolidated from the date of acquisition, which is the date on which the group obtains control of the subsidiary and continue to be consolidated until the date that control ceases.

The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

Intercompany transactions

All intergroup balances, transactions, income and expenses are eliminated in full in the consolidated financial statements.

3.2 Retained earnings

Retained earnings comprises of accumulated profits or losses less dividends to equity holders. Dividends are included in the statement of changes in equity in the year in which they are declared.

3.3 Accounting estimates, judgements and assumptions

In preparing these consolidated financial statements, management has made estimates, judgements and assumptions that affect the reported amounts of assets, liabilities, income and expenses. These estimates, judgements and assumptions are guided by the application of IFRS® Accounting Standards, while also taking into account the knowledge and experience of management.

Management believes that the estimates, judgements and assumptions made are appropriate considering the facts and circumstances available. However, the actual results may differ with subsequent changes to the underlying facts and circumstances.

Estimates, judgements and assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively. All estimates, judgements and assumptions are consistent with prior year, except where otherwise indicated.

3.3.1 Material accounting estimates, judgements and assumptions

The following estimates, judgements and assumptions made in applying the accounting policies that have the most material effect on the amounts recognised in these financial statements are:

Revenue from contracts with customers (note 4)

The group sells motor vehicles with a maintenance and service plan, as well as road side assistance, to customers as three separate performance obligations. Whilst the sale of the motor vehicle is recognised immediately as revenue, the maintenance, service, and roadside assistance revenue are recognised as contract liabilities and released into revenue over the lifetime of the contract.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

3. Presentation of financial statements (continued)

These maintenance, service, and roadside assistance obligations are completed within the lesser of 100 000 kilometres or five years. Contract liabilities and prepaid expenses are not financial instruments because they are settled by the delivery or receipt of goods and services.

Assumptions that affect the group's estimate for maintenance and service obligations include:

- distribution cost
- discount rate
- inflation rate
- part sales
- labour, parts and repair factors
- profit margin on parts

MBSA provides additional after-sales services, including roadside assistance and warranty coverage.

Assets leased under operating leases (note 18)

Lease classification

The group leases motor vehicles within MBFS to external customers. The factors that have been taken into consideration in determining the classification as operating leases are:

- ownership of the underlying motor vehicle is retained by the holding company during, and in most cases, at the end of the lease term;
- there is no bargain purchase option offered to the customer;
- the lease term is shorter than the majority of the economic life of the asset;
- at inception of the lease, the present value of the minimum lease payments does not amount to at least substantially all of the fair value of the underlying motor vehicle; and
- the leased assets are not specialised in nature.

MBSA enters into repurchase agreements with customers. Upon maturity of these agreements, customers have the option to either purchase the vehicle or return it to MBSA. Management has determined that the material risks and rewards of ownership of the underlying motor vehicles in these lease arrangements have not transferred to the customer. Additionally, MBSA guarantees the residual value of the motor vehicles."

MBSA has granted the guarantee to MBFS and will bear any losses below the residual value.

The requirement to recognise a sale with a residual value guarantee by MBSA as a lease, only applies if the respective residual value guarantee is material. A residual value guarantee is considered to be material if the present value of the residual value guarantee is greater than 10% of the original selling price of the motor vehicle.

Residual values

The group regularly reviews the factors applied in determining the values of its leased motor vehicles. In particular, it is necessary to estimate the residual values of the motor vehicles at the end of their leases, which constitutes a substantial part of the expected future cash flows from the motor vehicles.

Assumptions have been made regarding the future supply of, and demand for, motor vehicles; as well as trends in future motor vehicle prices. These assumptions are, in part, informed by publications provided by expert third parties, and supported by internal information.

Management updates residual value estimates quarterly based on calculations which use a combination of externally obtained market data which is enhanced with actual trade and retail values, as well as internal data obtained locally as well as from MBGAG. A Residual Value Steering Committee meets and approves the revised residual values on a quarterly basis. This committee has fixed terms of reference and its members comprise a group of persons with suitable qualifications and experience.

The residual values determined serve as a key input into the depreciation charge. Changes in residual values lead either to prospective adjustments of the depreciation charge or, in the case of a material decline in expected residual values, to impairment.

If depreciation is prospectively adjusted, changes in the estimates of residual values do not have a direct effect, but are equally distributed over the remaining periods of the lease contracts.

Depreciation

The depreciation rates applied to manufactured lease assets is consistent with the lease terms, and ranges from approximately 2 to 5 years.

Economic life

The lease term is understood to mean the period between the sale with residual value guarantee and the earliest date on which the residual value guarantee can be redeemed under the terms of the contract. If this period is less than 75% of the economic life of the asset, it is assumed that substantially all the risks and rewards incidental to ownership of the asset have remained with the company.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

3. Presentation of financial statements (continued)

Present value of future minimum lease payments

The total minimum lease payments are considered to be the difference between the group's sales proceeds and the guaranteed residual value; in other words, the present value of the residual value guarantee must be greater than 10% of the original selling price to cause the present value of minimum lease payments to be less than 90% of the fair value.

In this case, it is assumed that substantially all the risks and rewards incidental to ownership of the asset have remained with the company. The determination of present value is based on a market related interest rate for similar leases.

Production incentives receivables (note 15)

Production incentives are recognised as a receivable when all of the conditions relating to the underlying incentive scheme have been complied with, even though the physical certificates may not yet have been received from the issuing authority. Management believe this treatment to be appropriate as the process of receiving the certificates is, for the most part, clerical and there are seldom cases where certificates are withheld.

Production incentives receivables are measured based on the planned utilisation of the incentives. It also considers the planned sales to the external market. The utilisation plan considers the method of realisation of the incentive, the planned production of the plant and the planned future import of parts and fully built up motor vehicles. These grants are applied to the corresponding property, plant and equipment asset, thereby reducing the depreciation expense in cost of goods sold.

Furthermore the measurement takes into account, among others, the industry from which the incentive was derived and the export location to which the incentive will be applied (e.g. EU versus non-EU country).

These factors each have an impact on the value of the certificate as they affect:

- whether the incentive can be used or will expire and become void;
- whether the incentive should be sold, thus realising a different value;
- at what value the incentive is raised as the originating industry drives its creation value; and
- at what value the incentive can be realised, as the use of the incentive for imports from different locations drives its value on realisation.

When determining the valuation of the incentives management apply a weighting to each of the factors and using this weighting determine an overall recognition percentage of the value of the incentive based on the prescribed legislation.

VALA

The portion expected to be used to rebate future custom's accounts is valued at the applicable percentage subject to discounting over the expected recovery period.

Any excess VALA that will be converted to a PRC should be impaired by the penalty on conversion and then valued as a PRC.

PRC's

These are financial instruments and are valued in accordance with the expected manner of recovery.

Incentives are calculated based on an estimated usage rate. PRC's can be utilised for FBU imports in EU markets (18%) and Non-EU markets (25%), or they can be sold to external FBU importers at a competitive market rate. MBSA assesses the incentives using this weighted average usage rate for all three of the above potential uses.

The main portion is expected to be sold at the agreed contractual rates or current market values, as applicable. The values are subject to impairment. PRC's are also used to rebate future CBU imports at the weighted average customs duty.

Allowance for impairment of loans and advances to customers (note 14)

The group regularly estimates the risk of default on advances to customers. Many factors are taken into consideration in this context, including historical loss experience, the size and composition of certain portfolios, current economic events and conditions and the estimated fair values and adequacy of collaterals. Changes in economic conditions can lead to changes in our customers' creditworthiness and to changes in used vehicle prices, which would have a direct effect on the market values of the vehicles assigned as collateral. Changes to the estimation and assessment of these factors influence the allowance for credit losses with a resulting impact on the group's profit or loss.

Scoring systems are applied for the assessment of the default risk of retail and small business customers. Corporate customers are evaluated using internal rating instruments. Both evaluation processes use external credit bureau data if available. The scoring and rating results as well as the availability of security and other risk mitigation instruments, such as advance payments, guarantees and, to a lower extent, residual debt insurances, are essential elements for credit decisions.

Loans and finance lease receivables related to retail or small business customers are grouped into homogeneous pools and collectively assessed for impairment. Impairments are required for example if there are adverse changes in the payment status of the borrowers included in the pool, adverse changes in expected loss frequency and severity, and adverse changes in economic conditions.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

3. Presentation of financial statements (continued)

Material loans and leases to corporate customers are tested individually for impairment. An individual loan or lease is considered impaired when there is objective evidence that the group will be unable to collect all amounts due as specified by the contractual terms. Examples of objective evidence that loans or lease receivables may be impaired include the following factors: material financial difficulty of the borrower, a rising probability that the borrower will become bankrupt, delinquency in their installment payments, and restructured or renegotiated contracts to avoid immediate default.

In determining the amount of the impairment the group considers the following:

- the probability of default which is a measure of the expectation of how likely the customer is to default;
- the exposure at default which is the expected amount outstanding at the point of default; and
- the loss given default which is the expected loss that will be realised at default after taking into account recoveries through collateral and guarantees.

3.3.2 Key sources of estimation uncertainty

These judgements and estimates may not individually have a material effect on the amounts recognised in the consolidated financial statements. However, the input factors considered are in certain instances complimentary in such a way that the estimates and judgements may, at times, result in an additive effect. This effect would thus become material to amounts recognised across the consolidated statement of financial position or profit or loss as a whole. Furthermore the amounts recognised in the consolidated financial statements to which these judgements and estimates relate are considered material to management.

Taxation

The calculation of the group's tax charge and provision for income taxes may in some instances involve a degree of challenge by the tax authorities. The group follows a robust process which includes, where appropriate, the use of external advice to ensure full compliance with tax laws. Although a robust process is followed, there may be transactions where the ultimate tax treatment or result may be challenged by the tax authorities.

In the case of a challenge by the tax authorities, the final tax charge cannot be determined until a resolution has been reached with the relevant tax authority. The group recognises liabilities for anticipated tax issues and challenges in line with IFRIC 23. Where the final outcome is different from the amounts that were initially recorded, such difference will impact the current and deferred income tax in the reporting period in which such determination is made.

Property, plant and equipment (note 18)

Useful lives

Land is not depreciated as it is deemed to have an indefinite useful life.

The useful life of an asset is the period in which the group expects to utilise the benefits embodied in the assets, and not necessarily the assets' economic life. Useful lives of assets are reviewed annually. The group uses the following indicators to determine useful life:

- expected usage of assets;
- expected physical wear and tear; and
- technical and commercial obsolescence.

The estimated useful lives assigned to the categories of property, plant and equipment are as follows:

Item	Average useful life (years)
Buildings	25
Plant and equipment	4 – 12
Other factory equipment and furniture	3 – 10
Motor vehicles	5 – 10
Assets leased under operating leases	3 – 5
Right-of-use assets	over the term of the lease

Residual values

An estimate is made of the amount the group would expect to receive currently for the asset if the asset were already of the age and condition expected at the end of its useful life, which is considered to be its residual value. Residual values are reviewed annually.

Impairment

Management assesses changes in interest rates, currency exchange rates as well as the state of affairs in the motor manufacturing sector as indicators that impairment testing may need to be performed.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

3. Presentation of financial statements (continued)

Provisions (note 24)

Guaranteed residual value provision

The group is exposed to the risk that leased motor vehicles are returned at a value less than the residual value guaranteed to customers under the terms of each respective lease agreement. Accordingly, a provision is raised to the extent that the carrying values of leased motor vehicles are impaired through residual values not being fully recoverable.

Uncertainties that affect the provision amount include:

- return-rates of leased motor vehicles;
- penetration rates;
- lease duration; and
- market conditions.

Furthermore, the group periodically reviews its exposure to the underwritten portfolio to changes in market conditions since inception of the agreements and ensure satisfactory coverage of motor vehicles' projected valuations to underwritten values. Where risks are identified the group develops strategies to manage the risk position of the particular assets and further ensures provision is made for such potential loss.

Roadside assistance

Roadside assistance is accounted for as a contract liability and is recognised as a separate performance obligation. This liability is released over the duration of the service contract.

Warranty provision

Customers receive a 5-year warranty. The first two years are covered by MBAG, while the remaining years are outsourced to an insurance company.

The provision is measured based on historical warranty expenses. It represents the total warranty credits and costs necessary to investigate and settle warranty claims. The provision amount for warranty arrangements is determined based on the expected cost to settle these claims. Possible recall or buyback campaigns are excluded from this provision, as they are fully reimbursed by MBAG. MBSA carries the provision for locally manufactured C-class vehicles on the balance sheet in accordance with IAS 37. Additionally, extended warranty claims paid to the insurer are accounted for in accordance with IAS 37. MBSA also provides separately for warranty recoveries for the period year 3-5 with the corresponding asset accounted for in trade receivables.

Plant production related provisions

This provision relates to provisions for supplier volume reduction and onerous contracts as a result of production related activities.

Transfer pricing

During the 2023 financial year, MBSA received correspondence from SARS in relation to its ongoing tax review opened in October 2020. The uncertain tax treatment relates to the interpretation of how the tax legislation applies to the group's transfer pricing arrangements. Due to the uncertainty involved, there is a possibility that the outcome of the tax review is materially different from the amount currently recognised.

Employee benefits defined benefit schemes (note 20)

Defined benefit schemes

The following assumptions are applied in determining the present value of the defined benefit obligation:

Actuarial assumptions for defined benefit schemes

	2024	2023
<i>Discount rates used</i>		
Pre-retirement discount rate	10.77 %	12.81 %
Post-retirement discount rate	6.12 %	6.63 %

Maintenance and service contracts	1 134	627
Revenue other than from contracts with customers	622	665
	3 116	2 714
	62 307	75 364

* A prior period error occurred resulting in a restatement of the prior year revenue and cost of goods sold. Refer to note 36 for further details.

** The restatement of non-interest revenue, reflecting a change from the prior year figure of R 734 million to R 69 million, excludes the portion relating to Revenue other than from contracts with customers, which was previously included here, providing a clearer and more accurate representation of the revenue streams.

4.3 Timing of revenue recognition

Note

At a point in time***

Sale of goods*	59 191	72 650
----------------	--------	--------

Over time

Maintenance and service contracts	25	1 134	627
-----------------------------------	----	-------	-----

Total revenue from contracts with customers

60 325	73 277
---------------	---------------

* A prior period error occurred resulting in a restatement of the prior year revenue and cost of goods sold. Refer to note 36 for further details.

*** This note previously included total revenue recognised and has been restated to only include IFRS 15: Revenue from contracts with customers to be disclosed, enhancing transparency and consistency in the group's financial reporting.

4.4 Revenue from contracts with customers

4.4.1 Revenue from sale and leasing of vehicles and other related services

This revenue includes revenue and leasehold income generated on the sale (new and used) or lease of vehicles and the sale of related spare parts, as well as vehicle services, after-sale services and other related income.

MBSA uses a variety of sales promotion programs dependent on various market conditions during the year as well as the respective product life cycles and product-related factors (such as amounts of discounts offered by competitors, excess industry production capacity, the intensity of market competition and consumer demand for the products). Depending on the nature of these programs, they are recognised either as a reduction in revenue or selling expenses.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

4. Revenue (continued)

Revenue is recognised as control is passed, either over time or at a point in time.

Recognition and measurement

Sale of vehicles, service parts and other related products:

Revenues from the sale of products are recognised when the performance obligations are met and ownership of the goods are transferred to the customer depending on the terms and conditions of the contract. Revenue is recognised when the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the entity and costs incurred or to be incurred in respect of the sale can be measured reliably. Revenue is recognised net of sales reductions such as cash discounts and sales incentives granted.

Revenue is measured at the transaction price of the consideration received/receivable which the company is entitled in exchange for transferring promised goods or services to the customer (net of discounts, cash incentives, customer bonuses and rebates granted - which are payable to third parties).

Rendering of services:

Rendering of services is recognised over time in accordance with IFRS 15, taking into consideration the expected profit margins most appropriate to the type of service:

- servicing fees included in the price of products sold are recognised by reference to the proportion of the cost to the total cost of providing the servicing for the product sold, taking into account historical trends in the number of services actually provided on past goods sold;
- time and material contracts are recognised at the contractual rates as labour hours are delivered and direct expenses are incurred; and
- the group offers extended, separately priced service and maintenance contracts for certain products. Revenue from these contracts is deferred and recognised over the contract period in proportion to the costs expected to be incurred based on historical information.

Lease of vehicles:

Lease income is recognised on a straight-line basis over the lease term.

Lease income is measured at the fair value of the operating lease instalments received adjusted for the effect of straight-lining and excluding any contingent rentals received. Revenue is generated from lease payments on the basis of the underlying leasing contracts and is materially impacted by the residual value as determined in note 18, Assets leased under operating leases.

Initial direct costs:

Any Initial direct costs incurred by MBSA in obtaining an operating lease are added to the carrying amount of the underlying asset and cannot be recognised immediately as an expense. These initial direct costs are recognised as an expense on the same basis as the lease income. This will not necessarily be consistent with the basis on which the underlying asset is depreciated.

4.4.2 Revenue from financial services

Interest received

Interest received consists of interest earned on finance leases, installment sale agreements and wholesale funding provided to customers and dealers of MBSA products.

Interest received is recognised on the time proportion basis, using the effective interest method.

Interest received is measured at the interest rate that exactly discounts the estimated future cash receipts through the expected life of the underlying financial instrument.

Where the financial instrument has been impaired interest income continues to be recognised on the impaired value based on the original effective interest rate.

Non-interest revenue

Revenue generated by the financial services business which is non-interest in nature and includes:

- income from the leasing business;
- sales revenue from the sale of vehicles at the end of lease contract (remarketing revenue); and
- fees and commissions earned from related financial services activities.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

4. Revenue (continued)

Non-interest revenue is recognised on:

- the straight-line basis over the period of the lease;
- vehicles sales as noted above; and
- fees and commissions on a time proportion basis over the contract term.

Non-interest revenue is measured:

- at the effective yield on the net investment outstanding;
- for vehicles sales as noted above; and
- at the fair value of the consideration received/receivable.

4.4.3 Dealer incentive commission

The group pays motor dealerships trading in relevant group products commissions for engaging in financial services activities through the group's financing business.

These commissions are initially capitalised within loans and advances to customers and subsequently expensed to profit or loss on a straight-line basis over the term of the related financial contract. Where contracts are terminated early any remaining balance is immediately expensed to profit or loss.

2024 R mil	2023 R mil
---------------	---------------

5. Cost of goods sold

Cost of goods sold

55 262	64 463
--------	--------

A prior period error occurred resulting in a restatement of the prior year revenue and cost of goods sold. Refer to note 36 for further details.

Cost of goods sold includes the following:

- costs incurred in relation to the rendering of services included in revenue;
- depreciation on plant, equipment and manufacturing facilities as well as operating leased assets;
- wages and salaries of employees directly involved in producing or delivering a product or service;
- overheads incurred as part of the production activities;
- inventories utilised in the manufacture and sale of vehicles, parts and components;
- write down of inventories to NRV and any loss of inventory or reversals of previous write-downs or losses are recognised in cost of sales in the period the write-down, loss or reversal occurs; and
- reduced by the value of PRC and VALA grants received which are set off against the cost of the inventories or materials to which they relate. Refer to government grant policy for further details.

Income and expense based grants

PRC

PRC's for vehicles and components are recognised on the sale of manufactured vehicles and components.

These PRC's are then utilised to offset the import duties payable on the sale of locally sold vehicles. Excess PRC's are sold into the market at a discounted rate.

The measurement of PRC's is dependent on the utilisation factors applied. PRC's are recognised as a reduction in the cost of the inventories or material to which they relate, and measured at the value of the costs avoided.

VALA

VALA is recognised on sale as a reduction in the cost of the inventories or materials to which it relates.

VALA is measured at the value of the costs avoided.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

	2024 R mil	2023 R mil
6. Interest paid and non-interest expenditure		
Interest paid		
Interest-bearing borrowings at amortised cost	(809)	(1 058)
Non-interest expenditure		
Direct costs from financial services	(267)	(254)
Remarketing cost of sales	(81)	(78)
	(348)	(332)

To enhance disclosure and for greater transparency of the financial statements, the above interest paid and non-interest expenditure were separated from revenue (refer note 4), where it was previously disclosed. To align to the enhanced disclosure, the prior period disclosure was also re-presented.

Interest paid

Interest paid consists of external interest cost associated with the financial services activities of the group.

Interest paid is recognised on the time proportion basis, using the effective interest method.

Interest paid is measured at the interest rate that exactly discounts the estimated future cash payments through the expected life of the underlying financial instrument.

Non-interest expenditure

These expenses are related and incremental to the non-interest revenue generated and include, among others:

- fees paid to dealers;
- depreciation and impairment charges on the operating lease assets; and
- the residual value of the vehicle at the date of sale.

7. Other income

Recharging of expenses	634	414
Other	56	88
	690	502

Additional information has been disclosed to provide more detail in regards to the compilation of other income.

Other income is recognised when the right to receive reimbursement has been established.

Other income is measured at the fair value of the consideration received/receivable.

8. Operating profit

Operating profit for the year includes:

Staff costs

Cost of goods sold	2 563	2 153
Operating expenses	376	270
Selling expenses	204	191
Total staff costs	3 143	2 614

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

8. Operating profit (continued)

Employee benefits

Short-term employee benefits

Short-term employee benefits includes salaries, wages and costs of temporary employees, paid vacation leave, sick leave, bonuses and non-monetary benefits such as medical care. It is recognised as an expense and included in staff costs as services are rendered.

Long-term service benefits

The group's net obligation in respect of long-term service benefits, other than pension plans, is the amount of future benefits that employees have earned in return for their services in the current and prior periods.

The obligation is calculated using the projected unit credit method, is discounted to its present value and the fair value of any related assets is deducted. The discount rate used is based upon the rate for high quality corporate bonds at the valuation date.

Remeasurements are recognised in profit or loss in the period when they arise.

	2024 R mil	2023 R mil

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities/(assets) for the current and prior periods are measured at the amount expected to be paid to/(recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

11. Taxation (continued)

The income tax expense consists of current and deferred tax. It is recognised in profit or loss, except for the tax on transactions recognised directly in equity or other comprehensive income. Tax on these transactions is also recognised in equity or other comprehensive income.

In accordance with IAS 12, the group has offset deferred tax assets and liabilities as they relate to income taxes levied by the same taxation authority on the same taxable entity. The group has a legally enforceable right to offset current tax assets and liabilities, and intends to settle the deferred tax assets and liabilities on a net basis.

The net deferred tax liability represents the group's best estimate of future tax effects, and the tax positions taken have been assessed based on the applicable tax laws.

The calculation of the group's tax charge and provision for income taxes may in some instances involve a degree of challenge by the tax authorities. The group follows a robust process which includes, where appropriate, the use of external advice to ensure full compliance with tax laws.

Although a robust process is followed, there may be transactions where the ultimate tax treatment or result may be challenged by the tax authorities. In the case of a challenge by the tax authorities, the final tax charge cannot be determined until a resolution has been reached with the relevant tax authority.

The group recognises liabilities for anticipated tax issues and challenges in line with IFRIC 23. Where the final outcome is different from the amounts that were initially recorded, such difference will impact the current and deferred income tax in the reporting period in which such determination is made.

Management assesses the extent to which it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

The calculation of the group's tax charge and provision for income taxes necessarily involves a degree of estimation and judgement. There are transactions and tax computations for which the ultimate tax treatment or result is uncertain, or in respect of which the relevant tax authorities may or could indicate disagreement with the group's treatment and accordingly the final tax charge cannot be determined until resolution has been reached with the relevant tax authority.

The group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due, based on appropriate external advice. Where the final tax outcome is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the reporting period in which such determination is made.

The group considered the following criteria in assessing the probability that taxable profit will be available against which the unused tax losses can be utilised whether:

- the entity has sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity, which will result in taxable amounts against which the unused tax losses can be utilised;
- it is probable that the entity will have taxable profits before the unused tax losses expire; and
- the unused tax losses result from identifiable causes which are unlikely to recur.

To the extent that it is not probable that taxable profit will be available against which the unused tax losses or unused tax credits can be utilised, the deferred tax asset is not recognised. To determine the probability that taxable profit will be available against which the unused tax losses can be utilised, the group reviewed its forecasts for the foreseeable future and compared that to its total tax losses.

Uncertain tax position

Of the group's current tax provision, R 696 million (2023: R 624 million) relates to management's estimation of the amount of tax payable by MBSA for the ongoing tax review, which SARS opened in October 2020. The group paid SARS R 400 million during the 2024 financial year. The uncertain tax treatment relates to the interpretation of how the tax legislation applies to the MBSA's transfer pricing arrangements. Due to the uncertainty involved, there is a possibility that the outcome of the tax review is significantly different from the amount currently recognised.

Pillar-Two consideration

In December 2021, the Organisation for Economic Co-operation and Development ("OECD") released the Global Anti-Base Erosion Model Rules ("Pillar Two") to reform international corporate taxation that aims to ensure that applicable multinational groups (with consolidated revenue exceeding € 750 million) pay a minimum effective corporate tax rate of 15%.

On 24 December 2024 South Africa published the Global Minimum Tax Act, 2024 (hereinafter referred to as "Pillar Two") in its Official Gazette. The Act applies for fiscal years beginning on or after 1 January 2024.

The Pillar-Two rules apply to multinational enterprises that have consolidated revenues (as reported in the Consolidated Financial Statements of the Group, which have been prepared in accordance with an Acceptable Financial Accounting Standard) of € 750m in at least two of the last four years.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

11. Taxation (continued)

The MBSA group is operating within South African jurisdiction, i.e. where the entities are incorporated. All entities within MBSA group have an effective tax rate that exceeds 15% as per the OECD's Pillar-Two rules. In addition, the MBSA's ultimate holding entity, the MBAG group has also performed transitional Safe-Harbour tests and did not identify South Africa jurisdiction to be impacted due to the Pillar-Two rules.

Thus, based on the above Pillar-Two assessment, there is no tax impact for the current financial year.

Cash and cash equivalents in the statement of cash flows	2 143	132

12. Cash and cash equivalents

Statement of financial position disclosure

Cash and cash equivalents

Bank overdraft

Cash and cash equivalents in the statement of cash flows

Cash and cash equivalents comprise coins and bank notes, money at call and short notice and balances with commercial banks. Cash and cash equivalents also includes bank overdrafts.

All balances included in cash and cash equivalents have a maturity date of less than three months from the date of acquisition. Money at short notice constitutes amounts withdrawable in 24 hours or less. Bank overdrafts are repayable on demand and form an integral part of the group's cash management.

These instruments are considered financial assets or financial liabilities carried at amortised cost.

13. Assets held for sale

The group classifies non-current assets or disposal groups as held for sale if the carrying amount will be recovered principally through a sale transaction rather than through continuing use. In this case, the assets or disposal groups are no longer depreciated but measured at the lower of carrying amount and fair value less costs to sell.

Immediately before classification as held for sale, the carrying amount of the asset is determined in accordance with the applicable individual requirements. If fair value less costs to sell subsequently increases, any impairment loss previously recognised is reversed. This reversal is restricted to the impairment loss previously recognised for the assets or disposal group concerned.

The group generally discloses these assets or disposal groups separately in the consolidated statement of financial position.

Koppieview

As of the end of 2021 the MBSA group embarked on the process of selling all of the properties that were owned by Koppieview. Two of the properties were sold subsequently with one property (Zwartkops, previously MBSA head office) in the process of being sold.

As all these properties were actively marketed or in the process of sale, management decided to classify these properties according to IFRS 5 *Assets held for sale*.

At 31 December 2024, a bond registered on the property, which was fully repaid, was never cancelled at the deeds office and therefore the property could not transfer to the new owner. During 2024 the group obtained an High Court order, which enables it to register the township and finalise the sale.

Fair value determination

The fair values of the properties being sold were determined based on the offers received from potential buyers. Based on the offers received the fair values of the properties were considered Level 3 fair values in terms of IFRS 13.

Other

During 2023 both MBRS and Clidet were liquidated. Both companies have been dormant for the previous five years.

The following table sets out the group policy on the ageing of advances (i.e. when an advance is considered past due or non-performing):

Description	Type of advance	Group policy on past due/impaired
Past due advances	The past due analysis is only performed for advances with specific expiry or installment repayment dates or demand loans for which payment has been demanded. The analysis is not applicable to overdraft products or products where no specific due date is determined. The level of risk on these types of products is assessed with reference to the counterparty ratings of the exposures and reported as such.	
	The full outstanding amount is reported as past due even if part of the balance is not yet due.	
	Loans with a specific expiry date (term loans) and consumer loans repayable by regular instalments (personal loans)	Treated as overdue where one full installment is in arrears for one day or more and remains unpaid as at the reporting date. Advances on which partial payments have been made are included in neither past due nor impaired until such time as the sum of the unpaid amounts equal a full installment, at which point it is reflected as past due.
	Loans payable on demand (bank overdrafts and overnight facilities)	Treated as overdue where a demand for repayment has been served on the borrower but repayment has not been made in accordance with the instruction.
Non-performing loans	Retail loans	Individually impaired if three or more instalments are due or unpaid or if there is evidence before this event that the customer is unlikely to repay the obligations fully.
	Wholesale advances to motor vehicle dealerships	Analysed on a case-by-case basis taking into account breaches of key loan conditions, excesses and similar risk indicators.
Renegotiated advances	Past due advances which have been re-negotiated i.e. due to deterioration in the counterparty's financial condition, the group granted a concession where the original terms and conditions of the facility were amended and the counterparty is within the new terms of the advance.	Separately classified as neither past due nor impaired assets and remain classified as such until the terms of the re-negotiated contract expire.
	Excludes advances extended or renewed as part of the ordinary course of business for similar terms and conditions as the original.	Non-performing advances cannot be reclassified as re-negotiated but current unless the arrears balance has been repaid. Re-negotiated advances are considered as part of the collective evaluation of impairment where advances are grouped on the basis of similar credit risk characteristics. The adherence to the new terms and conditions is closely monitored.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

14. Loans and advances to customers (continued)

Impairment of loans and advances to customers

The adequacy of impairments of advances is assessed through the ongoing review of the quality of credit exposures. For amortised cost advances, impairments are recognised through the use of the allowance account method and an impairment charge in the consolidated statement of profit or loss and other comprehensive income.

The loss allowance for loans and advances is categorised as follows:

- Stage 1: low credit risk;
- Stage 2: increase in credit risk occurred, not credit impaired; and
- Stage 3: credit impaired and default contracts.

Specific impairments

Created for non-performing loans where there is objective evidence that an incurred loss event will have an adverse impact on the estimated future cash flows from the advance.

Potential recoveries from guarantees and collateral are incorporated into the calculation of impairment figures.

Portfolio impairments

Created with reference to performing advances. The impairment provision on the performing portfolio is split into two parts:

- an IBNR provision i.e. the portion of the performing portfolio where an incurred impairment event is inherent in a portfolio of performing advances but has not specifically been identified; and
- the PSI which reflects the decrease in estimated future cash flows for the sub-segment of the performing portfolio where there is objective evidence of impairment.

Write-offs

When an advance is uncollectable, it is written off against the related allowance account. Such advances are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of the "impairment losses" in profit or loss.

Amounts written off as uncollectable are subject to a continuing legal debt collection process.

Credit risk exposure

Credit risk is the risk of financial loss to the group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the group's receivables from customers. The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable mentioned above.

The group retains title to the underlying vehicles financed, collateral is assessed at the inception of the loan and on an ongoing basis for significant concentrations of credit risk, by reference to the underlying value of the vehicles financed. Management's assessment of the impairment of receivables considers the underlying collateral available for a class of customers/vehicles and it is determined on a portfolio basis.

The vehicles that are financed by the group are the assets which are held as collateral until the contracts are settled or returned to the MBSA group as per the risk share agreement.

MBFS manages the credit approval process for retail private and retail business applications through integrated scoring platforms. Each respective scoring engine provides a risk score outcome of an application based on the assessed potential loss risk. The score spectrum of the applications is classified into a range from R1 (very low loss potential) to R10 (very high loss potential). Customer, asset and deal structure are assessed in determining the risk score and include a range of factors.

The following table provides information about the exposure per credit risk rating and ECL's for contract assets. The gross exposure represents the value of portfolio and related delinquent amounts, as well as vehicles repossessed from customers, which remain classified as receivables until disposed at public auction and subsequent contract closure.

Dealer risk assessments for wholesale financing are performed at inception and reviewed annually considering current financial information and business performance.

Loss allowance

Trade receivables inherently expose the group to credit risk, being the risk that the group will incur financial loss if customers fail to make payments as they fall due. There have been no material changes in the credit risk management policies and processes since the prior reporting period.

In order to mitigate the risk of financial loss from defaults, the group only deals with reputable customers with consistent payment histories. Sufficient collateral or guarantees are also obtained when appropriate. Each customer is analysed individually for creditworthiness before terms and conditions are offered. Statistical credit scoring models are used to analyse customers. These models make use of information submitted by the customers as well as external bureau data (where available). Customer credit limits are in place and are reviewed and approved by credit management committees. The exposure to credit risk and the creditworthiness of customers, is continuously monitored.

A loss allowance is recognised for all trade receivables and is monitored at the end of each reporting period. In addition to the loss allowance, trade receivables are written off when there is no reasonable expectation of recovery, for example, when a debtor has been placed under liquidation. Trade receivables which have been written off are not subject to enforcement activities.

The group measures the loss allowance for trade receivables by applying the simplified approach. In accordance with this approach, the loss allowance on trade receivables is determined as the lifetime expected credit losses on trade receivables. These lifetime expected credit losses are estimated using a provision matrix. The provision matrix has been developed by making use of past default experience of debtors, but also incorporates forward looking information and general economic conditions of the industry as at the reporting date.

Financial assets at amortised cost

These instruments include trade and other receivables, which comprise short term receivables from customers and group companies arising from the day to day trading activities.

All financial assets are initially measured at fair value including transaction costs, except for those classified fair value through profit or loss in which case the transaction costs are expensed upfront in profit or loss, usually as part of other operating expenses. Any upfront income earned on financial instruments is recognised as deferred income, depending on the underlying nature of the income.

Financial assets are subsequently measured at amortised cost using the effective interest method, less any impairment losses.

Financial assets - Business model management

The group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. This information includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate portfolio, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the group's management;
- the risk that affects the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reason for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for the derecognition are not considered for this purpose, consistent with the group's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at fair value through profit and loss.

Financial assets - Assessment whether contractual cash flows are solely payments of principal and interest

For the purpose of this assessment, the "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative cost), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal, interest, the group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet the condition. In making this assessment, the group considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayments and extension features; and
- terms that limit the group's claim to cash flows from specified assets.

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is immaterial at initial recognition.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

15. Trade and other receivables (continued)

Transfers and derecognition

Financial instruments are derecognised when the contractual rights or obligations expire or are extinguished, are discharged or cancelled for example an outright sale or settlement. For financial assets this includes assets transferred that meet the derecognition criteria.

Fair value of trade and other receivables

The fair value of trade and other receivables approximates their carrying amounts. This is due to the short-term nature of the instruments.

16. Inventories

	2024 R mil	2023 R mil
Raw materials	4 809	5 180
Work in progress	507	643
Finished goods	4 059	5 528
	9 375	11 351

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

17. Amounts receivable from group companies (continued)

No allowance for non-collectable amounts was raised as the amounts carry minimal credit risk. Credit risk is minimal, and as such was deemed to be insignificant, as current group policies manage intergroup debts. In 2024 the interest rates on these "on-demand" trade receivables are between 7.85% and 9.1% (2023: 7.02% and 9.10%).

Financial assets at amortised cost are initially measured at fair value including transaction costs, except for those classified at fair value through profit or loss, in which case transaction costs are expensed upfront in profit or loss, usually as part of other operating expenses.

Financial assets are subsequently measured at amortised cost using the effective interest method, less any impairment losses.

Fair value of group loans receivable

The fair value of group loans receivable approximates their carrying amounts, due to the short-term nature of these instruments.

Categories and measurement

Categories	Initial measurement	Subsequent measurement	Depreciation method	Impairment
Land	Property, plant and equipment is initially recognised at cost.	Cost less accumulated impairment losses.	Not depreciated.	Assets are tested for impairment, when there is an indication that they may be impaired, by determining the recoverable amount of the assets either individually or at the cash generating unit level.
Buildings		Cost less accumulated depreciation and accumulated impairment losses.	Depreciation on straight-line method over the estimated useful life to the residual values. Refer to note 3.3.2.	Impairments are included within other operating expenses in profit or loss.
Plant and equipment				
Other factory equipment				
Motor vehicles				
Assets leased under operating leases				
Assets under construction		Cost less accumulated impairment losses.	Not depreciated.	

The assets' depreciation method, residual value and useful life are reviewed annually at each reporting date and adjusted if appropriate.

Operating leases (company as lessor)

Assets held under operating leases are recognised, at inception, as a separate category of property and equipment (assets leased under operating leases) and depreciated.

Rental income is recognised as revenue from sale and leasing of vehicles and related services on a straight-line basis over the lease term.

AIS

Reasonable assurance exists when conditions for the receipt of government grants are actually met and the grant will be received.

AIS is measured at the value of the grant amount received from the issuing authority, presented in the statement of financial position by deducting the grant in arriving at the carrying amount of the asset.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

18. Property, plant and equipment (continued)

The receivables relating to the various production incentives are recognised in note 15.

Capital expenditure

At 31 December 2024 the group authorised the acquisition of property, plant and equipment amounting to R 310 million (2023: R 287 million) as capital expenditure. This related to the production of the W206 model. This capital expenditure will be financed from internally generated funds.

18.1 Right-of-use assets

2024

	Land and buildings R mil	Factory and office equipment R mil	Total R mil
Opening balance	282	11	293
Additions	31	-	31
Disposals	(2)	-	(2)
Depreciation	(81)	(6)	(87)
	230	5	235

2023

	Land and buildings R mil	Factory and office equipment R mil	Total R mil
Opening balance	322	36	358
Additions	31	11	42
Disposals	-	(19)	(19)
Depreciation	(71)	(17)	(88)
	282	11	293

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset, on a straight-line basis. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

For right-of-use assets which are depreciated over their useful lives, the useful lives are determined consistently with items of the same class of property, plant and equipment. Refer to the accounting policy for property, plant and equipment for details of useful lives.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

------------------------	----	----

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

19. Other financial assets (continued)

Other financial assets consist of insurance cell assets measured at fair value.

MBSA consolidates its attributable share of an insurance cell captive managed on behalf of MBSA by Centriq Insurance. The net assets reserved within the cell captive are to be utilised against insurance claims arising within MBSA not covered by third-party insurances.

The value of the insurance cell asset is equal to the balance held by Centriq Insurance. This is a level 1 fair value.

Financial instruments (assets and liabilities) at fair value through profit or loss

Financial instruments (assets and liabilities) are initially measured at fair value including transaction costs, except for those classified at fair value through profit or loss in which case the transaction costs are expensed upfront in profit or loss, usually as part of other operating expenses. Any upfront income earned on financial instruments is recognised as deferred income, depending on the underlying nature of the income.

The carrying value of these assets approximates the fair value of the assets. Fair value items are measured at fair value at reporting date. The fair value gains or loss are recognised in profit or loss. The effective hedging portion is recognised in other comprehensive income.

20. Retirement benefit plan assets and post-retirement medical aid benefit obligations			
Net retirement benefit plan asset	20.1	204	214
Post-retirement medical aid benefit obligation	20.2	(438)	(406)

20.1 Retirement benefit plan asset

Defined benefit schemes

Present value of obligations	(2 012)	(1 932)
Fair value of plan assets*	2 308	2 243
Net defined benefit asset	296	311
Less: impact of application of asset ceiling*	(92)	(97)
Net defined benefit asset after application of asset ceiling	204	214

* The prior year amounts have been restated to more clearly illustrate the impact of the asset ceiling impact, ensuring transparency and enhancing the accuracy of the financial statement disclosures.

The policy of the group is to provide retirement benefits for its employees. All employees are either members of the Mercedes-Benz Pension Fund, which is a defined benefit scheme, or of the Mercedes-Benz DC Provident Fund which is a defined contribution scheme. The schemes are governed by the Pension Funds Act.

The Mercedes-Benz Pension Fund was last actuarially valued in October 2024. The overall expected rate of return on assets is determined based on the market expectations prevailing on that date, applicable to the period over which the obligation is to be settled. This is a closed fund.

MBSA and MBFS are under common control and participate in a benefit plan that shares risks. There is no policy or contractual agreement for charging the net defined benefit cost.

The policy for determining the contribution paid by the entities is based on an actuarial calculation as per the legal requirements.

Actuarial reserve comprises actuarial gains and losses, return on plan assets (excluding interest) and the effect of the asset ceiling.

The defined benefit plans expose the group to actuarial risk, such as longevity risk and currency risk, interest rate risk and market risk (investment risk).

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

20. Retirement benefit plan assets and post-retirement medical aid benefit obligations (continued)

Sensitivity analysis

Reasonable possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the obligation by the percentages shown below:

Assumption	Change applied to assumption	Resulting % change in defined benefit obligation - 2024		Resulting % change in defined benefit obligation - 2023	
		%	R mil*	%	R mil*
Discount rate	0.25 %	(2.40)%	(41.83)	(2.40)%	(37.90)
	(0.25)%	2.45 %	43.45	2.45 %	38.94
General inflation rate	0.10 %	0.90 %	15.35	0.95 %	14.01
	(0.10)%	(0.85)%	(15.14)	(0.90)%	(13.83)
Average age	+1 year	(2.10)%	(45.64)	(1.85)%	(36.10)
	-1 year	2.02 %	44.90	1.85 %	35.29

* The monetary value of the percentage change has been included to enhance disclosure and to provide a clearer understanding of the value impact of reasonable changes to the actuarial assumptions on the defined benefit obligation.

20.2 Post-retirement medical aid benefit obligation

	2024 R mil	2023 R mil
Present value of portfolio obligation	438	406

Portfolio

The group has funded its obligations to provide certain post-retirement medical aid benefits to its pensioners via the group's medical aid fund. The entitlement of these benefits is dependent upon the employee remaining in service until retirement age, completing a minimum service period and is subject to periodic review. The group funds the estimated liability over the working life of the eligible employees.

The post-retirement medical aid obligation and the annual cost of those benefits were determined by the independent actuaries of the fund in December 2024. The actuarially determined liability is allocated to provisions. The assumptions used are consistent with those adopted by the actuaries in determining pension costs and in addition, include long-term estimates of the increase in medical costs and appropriate discount rates. The level of claims is based on the individual company's experiences.

This is a closed fund.

Reconciliation of present value of post-retirement medical aid benefit obligation

The following table shows a reconciliation from the opening balance to the closing balance for the obligation and its components:

Opening balance	406	398

Notes to the Consolidated Financial Statements

20. Retirement benefit plan assets and post-retirement medical aid benefit obligations (continued)

** A detailed analysis of the actuarial gains has been provided to enhance disclosure in the financial statements, offering stakeholders clearer insight into the factors influencing the post-retirement medical aid benefit.

Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the obligation by the percentages shown below:

Assumption	Change applied to assumption	Resulting % change in past service contractual liability		Resulting % change in service cost and interest cost	
2024		%	R mil	%	R mil
Health care cost inflation	1.00 %	(0.10)%	(41.13)	(3.90)%	(1.97)
	(1.00)%	11.15 %	49.38	4.55 %	2.27
Mortality	+1 year	(2.65)%	(11.50)	(2.55)%	(1.50)
	-1 year	2.65 %	11.53	2.55 %	1.51
2023					
Health care cost inflation	1.00 %	(9.45)%	(38.85)	(4.45)%	(2.80)
	(1.00)%	11.30 %	46.70	5.15 %	3.27
Mortality	+1 year	(2.50)%	(10.18)	(2.50)%	(1.26)
	-1 year	2.50 %	10.19	2.55 %	1.51

20.3 Post-employment benefits

Defined contribution plans

The defined contribution plan refers to the Mercedes-Benz Provident Fund. Obligations for contributions to defined contribution pension plans are recognised as an expense in staff costs in profit or loss as incurred in the periods during which services are rendered by employees.

Defined benefit plans

The defined benefit plans refer to the Mercedes-Benz Pension Fund, the Mercedes-Benz Retirement Fund and the Post Employment Medical Aid Benefit Fund Portfolio.

Defined benefit obligation

The liabilities and assets of these funds are reflected as a net asset or liability in the statement of financial position i.e. the present value of the defined benefit obligation at the reporting date less the fair value of plan assets. Where the value is a net asset, the amount recognised is limited to the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The present value of the defined benefit obligation is calculated annually by independent actuaries using the projected credit unit method. The discount rate used is the rate of high quality corporate bonds that are denominated in the currency in which the benefits will be paid and have terms to maturity approximating the terms of the related pension liability. The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method.

Plan assets

The plan assets are carried at fair value. Where the plan assets include qualifying insurance policies that exactly match the amount and timing of some or all of the benefits under the plan, the fair value is deemed to be the present value of the related obligation. If the qualifying insurance policy has a limit of indemnity the fair value of the insurance policy is limited to that amount.

Profit or loss

Included as part of staff costs:

- current and past service costs calculated using the projected unit credit method;
- gains or losses on curtailments and settlements that took place in the current period; and
- realised actuarial gains or losses on long term employee benefits.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

20. Retirement benefit plan assets and post-retirement medical aid benefit obligations (continued)

Finance income and expenses are calculated by applying the discount rate at the beginning of the period to the net asset or liability.

Other comprehensive income

Actuarial gains or losses excluding interest on long term employee benefits are recognised in other comprehensive income. All other re-measurements in respect of the obligation and plan assets are included in other comprehensive income and never reclassified to profit or loss.

Actuarial reserve

The actuarial reserve in respect of the obligation and plan assets represents the effect of the changes in the actuarial assumptions and incorporates the differences between the actual experience and the assumed experience. The re-measurements in respect of the obligation and plan assets are included in other comprehensive income and never reclassified to profit or loss.

21. Share capital

	2024 Number	2023 Number
Authorised		
Ordinary shares	46 840 000	46 840 000
Issued		
Ordinary shares	46 810 000	46 810 000
	2024 R mil	2023 R mil
Composition of issued share capital and premium		
Ordinary shares at par value	47	47
Share premium	1 370	1 370
Total issued capital and premium	1 417	1 417
Reconciliation of share premium		
Balance at 1 January	1 370	5 370
Capital reduction	-	(4 000)
	1 370	1 370

Stated capital issued by the group is recorded at the proceeds received, net of issue costs. Stated capital comprises share capital and share premium. The shares are fully paid up.

All ordinary shares rank equally with regards to the group's residual assets. Holders of ordinary shares are entitled to dividends as declared from time to time and are entitled to one vote per share at annual general meetings.

During the 2023 financial year, MBSA paid a capital reduction of R 4 billion to its holding company, MBAG. Management is satisfied that the company met all the solvency and liquidity requirements prescribed by the Companies Act.

22. Trade and other payables

Financial instruments*

Trade payables	1 605	2 780
Other payables	159	340
	1 764	3 120

Non-financial instruments

VAT	4	6
Employee related liabilities	435	556
	2 203	3 682

* Lease liabilities was previously classified as trade and other payables. During 2024 management assessed the relevance of the allocation and concluded that lease liabilities should be classified separately on the statement of financial position, refer to note 36.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

22. Trade and other payables (continued)

The effect of the restatement is as follows:

Statement of financial position

	As previously reported R mil	Restatement R mil	Restated 2023 R mil
Trade and other payables	4 026	(344)	3 682
Lease liabilities	-	344	344

Liabilities at amortised cost

Includes interest-bearing borrowings, trade and other payables, and bank overdrafts:

- the group classifies a financial instrument that it issues as a financial liability or an equity instrument in accordance with the substance of the contractual agreement. Instruments which have been written down and conversion features are classified based on the nature of the instrument and the definitions of debt and equity;
- compound instruments are those financial instruments that have components of both financial liabilities and equity such as preference shares. At initial recognition the instrument and the related transaction costs are split into their separate components in terms of the definitions and criteria of IAS 32 and are subsequently accounted for as a financial liability or equity; and
- funding liabilities, bank overdrafts as well as trade and other payables are generally measured at amortised cost but may be measured at fair value through profit or loss if they are managed on a fair value basis or the fair value designation reduces or eliminates an accounting mismatch.

All financial liabilities are initially measured at fair value including transaction costs, except for those classified as fair value through profit or loss, in which case the transaction costs are expensed upfront in profit or loss, usually as part of operating expenses. Any upfront income earned on financial instruments is recognised as deferred income, depending on the underlying nature of the income.

Financial liabilities are subsequently measured at amortised cost using the effective interest method.

Transfers and derecognition

Financial instruments are derecognised when the contractual rights or obligations expire or are extinguished, are discharged or cancelled for example an outright sale or settlement.

For financial liabilities this includes substantial modification to the terms and conditions of an existing financial liability. A substantial modification to the terms occurs where the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability.

Mercedes-Benz Romania S.R.L.	-	2
	23	66
	5 464	5 456

All financial liabilities are initially measured at fair value including transaction costs, except for those classified as fair value through profit or loss, in which case the transaction costs are expensed upfront in profit or loss, usually as part of operating expenses. Any upfront income earned on financial instruments is recognised as deferred income, depending on the underlying nature of the income.

Subsequently group payables are recognised at amortised cost using the effective interest method. These are repayable on demand and settled in the ordinary course of business.

Fair value of group loans payable

The fair value of trade payables to group companies approximates their carrying amounts, due to the short-term nature of the instruments.

24. Provisions

Reconciliation of provisions - 2024

	Opening balance R mil	Additional provision R mil	Amounts utilised R mil	Amounts reversed R mil	Closing balance R mil
Warranty claims	184	277	(47)	(101)	313
Plant production related provisions	274	45	(55)	-	264

Reconciliation of provisions - 2023

Warranty claims	101	114	(31)	-	184
Plant production related provisions	408	312	(446)	-	274
Transfer pricing	-	367	-	-	367
Premium drive	239	69	(239)	-	69
Residual value	23	15	(7)	-	31
	771	877	(723)	-	925

Warranty claims

The provision for warranty claims represents the amount not recovered from MBGAG that is paid locally. The provision is calculated monthly for the warranty period based on estimates made from historical warranty claim experience associated with the products. The utilisation date of product warranties depends on the incidence of the warranty claims and can span the entire term of the product warranties. Included in the warranty provision is an amount of R 223 million for the extended warranty which forms part of the insurance recoveries, refer note 15.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

24. Provisions (continued)

Plant production related provisions

This provision relates to provisions for supplier volume reduction and onerous contracts as a result of production related activities. These provisions fluctuate based on changes in the production requirement.

Transfer pricing

The provision for transfer pricing relates to the uncertain tax treatment of transfer pricing arrangements, refer note 11. Management has made the decision to account for the penalties and interest relating to the transfer price assessment under IAS 37.

Premium drive

Provision for the present obligation of expected costs of maintenance and service agreements, the value of which is uncertain. MBSA took a strategic decision to review the insurance contracts on maintenance and service reimbursement and, as a result, raised a provision on premium drive. This provision is utilised as and when maintenance and service claims are settled.

Residual value risk

MBSA entered into a "residual value risk agreement" on behalf of MBFS whereby the group is liable for all residual value losses incurred in realising residual values on Mercedes-Benz branded products.

The exposure is periodically reviewed to the underwritten portfolio to adjust for changes in market conditions. Where risks are identified, the company develops strategies to manage the risk position of the particular assets and a provision is raised to this effect.

Roadside assistance

The provision for roadside assistance covers towing, mobility, and other on-the-road services for any Mercedes-Benz vehicle with an active service and maintenance plan.

25. Contract liabilities

Summary of contract liabilities

	2024 R mil	2023 R mil

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

25. Contract liabilities (continued)

Contract liabilities consist of liabilities from maintenance and service contracts with customers.

The group sells motor vehicles with a maintenance and service obligation to customers. Whilst the sale of the motor vehicle is recognised immediately as revenue, the maintenance and service revenue is recognised as deferred revenue and released into revenue upon the performance of a maintenance and service obligation. These maintenance and service obligations are completed within the lesser of 100 000 kilometres or five years.

Deferred revenue and prepaid expenses are not financial instruments because they are settled by the delivery or receipt of goods and services.

26. Interest-bearing borrowings

	2024 R mil	2023 R mil
Bonds issued under MBSA DMTN Programme	7 500	11 500

Interest repaid	(860)	(1 136)
	7 542	12 227

Interest-bearing borrowings are classified as financial liabilities carried at amortised cost

The group classifies a financial instrument that it issues as a financial liability or an equity instrument in accordance with the substance of the contractual agreement. Instruments which have been written down and conversion features are classified based on the nature of the instrument and the definitions of debt and equity; compound instruments are those financial instruments that have components of both financial liabilities and equity such as preference shares. At initial recognition the instrument and the related transaction costs are split into their separate components in terms of the definitions and criteria of IAS 32 and are subsequently accounted for as a financial liability or equity.

Funding liabilities are generally measured at amortised cost but may be measured at fair value through profit or loss if they are managed on a fair value basis or the fair value designation reduces or eliminates an accounting mismatch.

For the presentation of the fair value of the interest-bearing borrowings, refer to note 33.

Bonds issued under MBSA DMTN Programme

MBSA has issued bonds under its DMTN Programme, which are listed on the JSE. Bonds are issued periodically as funding requirements arise. The bonds are held to maturity, which ranging between 1 to 5 years with the final settlement being made on 17 September 2027 and are issued at market related rates of interest, referenced off the 3-month JIBAR with spreads between 0.880% to 1.090% (2023: 0.70% to 1.15%).

The group actively monitors the changes to ZARONIA, with no known updates to date.

The bonds issued under this programme have been unconditionally and irrevocably guaranteed by MBGAG.

27. Lease liabilities (continued)

A reconciliation of lease liabilities has been provided for additional information and to enhance the clarity of the financial statement disclosure.

Maturity profile of lease liability for the year ended

31 December 2024	Within 1 year R mil	Within 2 years R mil	Within 3 years R mil	Within 4 years R mil	5 years or more R mil	Total R mil
Lease liability	82	74	60	35	101	352
31 December 2023						
Lease liability	97	76	70	58	136	437

Leases

MBSA engages in various lease agreements to meet all operational requirements. Typical lease contracts include, but are not limited to, warehouse space for the storage and distribution of spare parts, head office space for administrative functions, IT equipment and additional space in East London for vehicle rework.

The company assesses whether a contract is, or contains a lease, at the inception of the contract. A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the company is a lessee, except for short-term leases of 12 months or less, or leases of low value assets.

The lease liability is measured at the present value of the outstanding lease payments, discounted by the incremental borrowing rate at the time of the lease liability recognition. The weighted average incremental borrowing rate was 7.06% (2023: 8.01%). The respective right-of-use asset is generally recognised at an amount equal to the lease liability.

The interest due on the lease liability is a component of interest expense. The lease expenses of short-term and low-value asset leases, classified as operating leases, have been fully recognised within finance expense.

Prepayments	(17)	(11)
Leased assets	(2)	(2)
	(2 525)	(3 115)
Total net deferred tax liability	(675)	(1 112)

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the tax base used for taxation purposes.

A deferred tax liability is recognised for all taxable temporary differences.

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised.

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which they can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

29. Segmental information

Basis for segmentation

The group is organised into four segments for operational and management purposes, being wholesale and retail vehicles, manufacturing and component exports, financial services and other. The group reports its primary business segment information on this basis.

The principal offering for each division is as follows:

- Wholesale and retail vehicles – passenger vehicles and commercial vehicle wholesale business including the retail business; and
- Manufacturing and component exports – manufacturing plant based in East London and component exports.
- Financial service – variety of leasing and specialised leasing products; and
- Other – residual of the operations, which does not constitute its own separate segment. This includes the property company.

Geographical information

All segments are managed in South Africa.

All revenues and assets from the financial services segment are domiciled in South Africa.

	2024		2023	
	Revenue from contracts with customers R mil	Non-current assets R mil	Revenue from contracts with customers R mil Restated*	Non-current assets R mil
Europe*	50 054	-	58 774	-
Africa	10 271	16 275	14 503	17 756
Total	60 325	16 275	73 277	17 756

* A prior period error occurred resulting in a restatement of the prior year revenue and cost of goods sold. Revenue resulting from Europe transactions was previously presented as R 60 429 million compared to R 58 774 million presented after the prior period error was corrected. Refer to note 36 for further details.

32.2 Capital risk management

The primary objective of the group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The capital management approach is driven by its strategic and organisational requirements taking into account the regulatory and commercial environment in which it operates.

The group manages its structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the year.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

	2024 R mil	2023 R mil
32. Financial instruments and risk management (continued)		
The capital structure and gearing ratio of the group at the reporting date was as follows:		
Total assets	40 790	49 499
Total equity	19 513	21 129
Equity-to-Asset ratio	47.84 %	42.69 %

32.3 Financial risk management

32.3.1 Objectives and policies

The board of directors has overall responsibility for the establishment and oversight of the group's risk management framework, including the implementation and monitoring of these policies.

The group has established internal guidelines for risk controlling procedures and for the use of financial instruments, including a clear segregation of duties with regard to financial activities, settlement, accounting and the related controls. The guidelines upon which the group's risk management processes for financial risks are designed to identify and analyse these risks throughout the group, to set appropriate risk limits and controls and to monitor the risks by means of reliable and up-to-date administrative and information systems. The guidelines and systems are regularly reviewed and adjusted to changes in markets and products.

32.3.2 Credit risk

Credit risk is the risk of economic loss arising from a counterparty's failure to repay or service debt in accordance with the contractual terms. Credit risk encompasses both the direct risk of default and the risk of a deterioration of creditworthiness as well as concentration risk.

The maximum exposure to credit risk is presented in the table below:

Cash and cash equivalents	2 145	156
Trade and other receivables	4 416	6 616
Financial assets and derivatives	82	80
Loans and advances to customers	9 639	10 525
Amounts receivable from group companies	4 330	8 957
	20 612	26 334

The group is exposed to credit risk through the following instruments:

Cash and cash equivalents

The group limits its exposure to credit risk by investing in liquid investments in financial institutions with a high credit rating, therefore management does not expect any counter party to fail to meet its obligations. Cash balances are held with reputable financial institutions, with a short-term credit rating of p-3 for all banks.

Trade and other receivables

Trade receivables are mostly receivables from sales activities of vehicles and spare parts. The credit risk from trade receivables encompasses the default risk of customers, as well as other corporate and private customers. The group manages its credit risk from trade receivables using appropriate IT applications and databases on the basis of internal guidelines. In order to minimise credit risk, the group assesses the creditworthiness of the counterparties. All receivables are regularly reviewed and impairments are recognised if there is any objective indication of non-performance or other contractual violations. The group establishes an allowance for impairment that represents its estimate of expected losses in respect of trade receivables.

Other financial assets

The group's exposure to credit risk on other financial assets is not material in relation to the overall credit risk of the group. Given the nature of these financial assets, management does not expect any counterparty to default on meeting its obligations.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

32. Financial instruments and risk management (continued)

Amounts receivable from group companies

The group's exposure to credit risk on trade receivables from group companies is managed within the Mercedes-Benz group and according to MBAG policy and credit terms. Given the nature of these receivables, management does not expect any counterparty to default on meeting its obligations.

The maximum risk positions of financial assets, generally subject to credit risk, are equal to their carrying amounts, except for lease instalments from operating leases, which is considered to be future minimum contractual amounts receivable under the lease contract.

Loans and advances to customers

The group's financing and leasing activities are primarily focused on supporting the sales of the group's automotive products. The group is therefore exposed to credit risk, which is monitored and managed based on defined standards, guidelines and procedures. MBFS manages its credit risk irrespective of whether it is related to an operating lease or a finance lease contract. For this reason, statements concerning the credit risk of MBFS refer to the entire financing and leasing business, unless specified otherwise.

Exposure to credit risk from financing and lease activities is monitored based on the portfolio subject to credit risk. The portfolio subject to credit risk is an internal control quantity that consists of wholesale and retail receivables from financial services and the portion of the operating lease portfolio that is subject to credit risk. Receivables from financial services comprise claims arising from finance lease contracts and repayment claims from financing loans.

In addition, the financial services segment is exposed to credit risk from commitments to retailers and end customers. This segment has guidelines setting the framework for effective risk management. In particular, these rules deal with minimum requirements for all risk-relevant credit processes, the definition of financing products offered, the evaluation of customer quality, requests for collateral as well as the treatment of unsecured loans and non-performing claims.

In general, these segments manage risk on retail receivables by placing limits on acceptable risk exposure to individual borrowers or groups of borrowers, and to industry segments. Lending limits are also put in place for officers of the segments to grant credit and a series of committees oversee the approval of large credit facilities both at inception and on an annual review basis. By nature, the retail receivables mostly consist of individual contracts.

Wholesale receivables consist of large groups of dealer companies with high value exposure. The group follows the MBAG group policies under which each new dealer is analysed for creditworthiness before standard payment, delivery terms and conditions are offered. Depending on the amount of the exposure to risk, the application will be assessed by either the local credit committee, the regional credit committee or the MBAG credit committee (based in Berlin, Germany), or a combination of these. Ownership of the vehicles lies with the group until the loan balance is settled.

Geographically, the credit risk concentration is predominantly concentrated to the South African market.

The ageing of loans and advances to customers and the mitigation of exposure to the balances at reporting date were as follows:

2024

	Gross maximum exposure R mil	Not past due R mil	Past due and impaired R mil
Retail and wholesale receivables	10 018	9 639	379
Allowance for impairment	(379)	-	(379)
	9 639	9 639	-

2023

Retail and wholesale receivables	10 919	10 525	394
Allowance for impairment	(394)	-	(394)
	10 525	10 525	-

As the group retains title to the underlying vehicles financed, collateral is assessed at the inception of the loan and on an ongoing basis for material concentrations of credit risk by reference to the underlying value of the vehicles financed. Management's assessment of the impairment of receivables considers the underlying collateral available for a class of customers/vehicles and is determined on a portfolio basis. Any concentration risk is managed through the group's credit policy.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

32. Financial instruments and risk management (continued)

The gross maximum exposure and concentration of credit risk exposure per geographical region at year end was as follows:

2024	Gross maximum exposure R mil	Loans and advances to customers R mil	Financial assets and derivatives R mil	Trade and other receivables R mil	Trade receivable from group companies R mil	Cash and cash equivalents R mil
South Africa	16 609	10 018	82	4 416	-	2 093
Europe	4 340	-	-	-	4 307	33
Americas	29	-	-	-	10	19
Asia	9	-	-	-	9	-
Oceania	4	-	-	-	4	-
	20 991	10 018	82	4 416	4 330	2 145

2023	Gross maximum exposure R mil	Loans and advances to customers R mil	Financial assets and derivatives R mil	Trade and other receivables R mil	Trade receivable from group companies R mil	Cash and cash equivalents R mil
South Africa	17 748	10 919	80	6 616	-	133
Europe	8 933	-	-	-	8 926	7
Americas	24	-	-	-	8	16
Asia	23	-	-	-	23	-
	26 728	10 919	80	6 616	8 957	156

The ageing profile of the trade receivables at reporting date is as follows:

2024	Gross amount R mil	Expected credit loss R mil	Carrying amount R mil
Not past due	501	-	501
30 - 90 days	299	-	299
91 - 180+ days	70	(11)	59
	870	(11)	859

2023	Gross amount R mil	Expected credit loss R mil	Carrying amount R mil
Not past due	878	-	878
30 - 90 days	364	(3)	361
91 - 180+ days	63	(3)	60
	1 305	(6)	1 299

The credit quality of trade receivables that are neither past due nor impaired is monitored and managed by the group, and comprises primarily receivables of companies who have a trading history with the group, as well as low-risk rated companies.

Inputs, assumptions and techniques used for estimating impairment

Incorporation of forward-looking information

The group's credit risk and credit losses for financial assets are influenced by historical data and various macro-economic variables.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

32. Financial instruments and risk management (continued)

Key drivers for the wholesale portfolio:

At 31 December 2024

5 year average

At 31 December 2023

5 year average

	GDP change %	Interest rate %	Unemployment rate %
5 year average	0.40 %	6.10 %	32.94 %
5 year average	(0.18)%	5.85 %	31.17 %

Modified financial assets

Calculating impairment through the loss estimation for portfolio contracts is a basic requirement of the IFRS 9 principle based on quality segmentation for all financial assets upon origination. The standard requires that the measurement process should consider the determination of unbiased and probability weighted ECL amounts, the time value of money and the inclusion of data that displays information about past, current and future events.

The approach adopted by the group in order to estimate the ECL is a calculation for each financial asset with probability weighted sum of discounted period contributions.

Measurement of ECL

The key inputs into the measurement of ECL are the terms structure of the following variables:

- Probability of default ("PD")
- Loss given default ("LGD")
- Exposure at default ("EAD")

The generalised ECL model is based on a multi-period approach, where the assumption is that the contract will default during a certain period. If the contract defaults during a specific period, a loss occurs where LGD is multiplied by EAD.

Defaults

Defaulting is assessed for each individual debtor based on the risks and circumstances surrounding the individual transaction.

32.3.3 Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they fall due. The group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the group's reputation.

The group monitors its risk to a shortage of funds using a recurring liquidity planning tool. This tool considers the maturity of both its financial investments and financial assets and projected cash flows from operations.

The group's objective is to maintain a balance between continuity of funding and flexibility through the use of interest-bearing borrowings, trade payables and trade payables to group companies.

The Mercedes-Benz Group manages its liquidity by holding adequate volumes of liquid assets and by maintaining credit facilities in addition to the cash inflows generated by its business operations. Liquid assets comprise mainly cash and cash equivalents and marketable debt securities.

Funds raised are used to finance working capital and capital expenditure as well as the cash needs of the lease and financing business and unexpected liquidity needs. In accordance with internal guidelines, the refunding of the lease and financing business is generally carried out with matching maturities so that financing liabilities have the same maturity profile as the leased assets and the receivables from financial services.

From an operating point of view, the management of the group's liquidity exposures is managed by a daily cash-pooling process. This process enables the Mercedes-Benz Group to manage its liquidity surplus and liquidity requirements according to the actual needs of the group and each subsidiary. The group's short-term and mid-term liquidity management takes into account the maturities of financial assets and financial liabilities and estimates of cash flows from business operations.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

32. Financial instruments and risk management (continued)

The following are the contractual maturities of financial liabilities based on contractual undiscounted payments:

2024

	0 - 12 Months R mil	1 to 2 years R mil	2 to 5 years R mil	Total R mil	Carrying amount R mil
<i>Non-derivative financial liabilities</i>					
Bank overdraft	2	-	-	2	2
Trade and other payables	1 764	-	-	1 764	1 764
Amounts payable to group companies	5 464	-	-	5 464	5 464
Interest-bearing borrowings	3 394	3 648	2 423	9 465	7 542
	10 624	3 648	2 423	16 695	14 772

2023

<i>Non-derivative financial liabilities</i>					
Bank overdraft	24	-	-	24	24
Trade and other payables*	3 120	-	-	3 120	3 120
Amounts payable to group companies	5 457	-	-	5 457	5 457
Interest-bearing borrowings	7 217	3 349	3 613	14 179	12 227
	15 818	3 349	3 613	22 780	20 828

* Lease liabilities was previously classified as trade and other payables. During 2024 management assessed the relevance of the allocation and concluded that lease liabilities should be classified separately on the statement of financial position, refer to note 36. Lease liabilities are not regarded as having a liquidity risk and therefore the maturity of the lease liabilities has been provided in note 27

32.3.4 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, residual values of motor vehicles and commodity prices will affect the group's income, cash flows or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The group manages market risks to minimise the impact of fluctuations in foreign exchange rates, interest rates as well as commodity and motor vehicle prices on its results. The group calculates its overall exposure to these market risks to provide the basis for hedging decisions, which include the selection of hedging instruments and the determination of hedging volumes and the corresponding periods.

32.3.4.1 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in market interest rates.

The group's exposure to changes in interest rates relates primarily to the group's interest-bearing borrowings. The group's policy is aligned to MBAG's general policy to match funding in terms of maturities and interest rates whenever economically feasible.

The Financial Stability Board had initiated a fundamental review and reform of the major interest rate benchmarks used globally by financial market participants. This review seeks to replace existing IBOR's with ARR's to improve market efficiency and mitigate systemic risk across financial markets.

The new ZARONIA rate was published for observation during 2022 and was endorsed as a successor rate in 2023. The formal announcement of the cessation of JIBAR as a reference rate is expected in 2025, allowing the ZARONIA market to develop in derivative and cash products during 2023 and 2024.

The group actively monitors the changes to ZARONIA, with no known updates to date.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

32. Financial instruments and risk management (continued)

Interest rate profile

The interest rate profile of interest-bearing financial instruments as reported to the management of the group is as follows:

	Variable rate instruments		Fixed rate instruments	
	2024 R mil	2023 R mil	2024 R mil	2023 R mil
<i>Financial assets</i>				
Cash and cash equivalents	2 145	156	-	-
Loans and advances to customers	9 639	10 525	-	-
Amounts receivable from group companies	-	-	4 330	8 957
	11 784	10 681	4 330	8 957
<i>Financial liabilities</i>				
Bank overdraft	(2)	(24)	-	-
Interest-bearing borrowings	(7 542)	(12 227)	-	-
	(7 544)	(12 251)	-	-

Interest rate sensitivity analysis

The following table demonstrates the sensitivity of the variable rate instruments to a reasonable possible change in interest rate, with all other variables held constant, on profit before taxation:

	2024		2023	
	Increase R mil	Decrease R mil	Increase R mil	Decrease R mil
Sensitivity analysis - 100 basis points adjustment in rate				
Net effect on profit before taxation and equity				
Financial assets	118	(118)	107	(107)
Financial liabilities	(75)	75	(123)	123
	43	(43)	(16)	16

32.3.4.2 Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in foreign exchange rates. The nature of the group's businesses exposes cash flows and earnings to risks due to fluctuations in exchange rates. These risks primarily relate to fluctuations between the Euro, the US Dollar ("USD") and the Singaporean Dollar ("SGD").

The group is exposed to foreign exchange rate risk between the date of order and the ultimate payment of the foreign invoices.

Foreign currency exposure at the end of the reporting period

	2024				2023		
	Euro R mil	USD R mil	SGD R mil	GBP R mil	Euro R mil	USD R mil	SGD R mil
Cash and cash equivalents	33	19	-	-	7	16	-

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

32. Financial instruments and risk management (continued)

Foreign currency sensitivity analysis

The following table demonstrates the sensitivity to a reasonable possible change in foreign exchange rates, with all other variables held constants, on the profit before taxation:

	2024		2023	
	Increase R mil	Decrease R mil	Increase R mil	Decrease R mil
Increase or decrease in exchange rate of 10%				
Impact on profit before taxation and equity				
Euro	(8)	8	26	(26)
USD	2	(2)	3	(3)
SGD	(1)	1	(3)	3
GBP	-	-	-	-

32.3.4.3 Residual value risk

The group is exposed to the risk of financed or leased assets being returned at values less than the residual value guaranteed under the terms of the respective agreements. These risks are managed by periodic reviews of the residual value risk. The decisions are taken by an inclusive committee and by reference to market conditions and comparative information.

Residual values on leased vehicles are estimated when the lease is entered into. Estimates involve a high level of subjectivity and judgement as the directors, through the Residual Value Steering Committee, are required to conclude on likely outcomes and probabilities based on quarterly forecasts and assumptions.

Further reviews are conducted of the exposure of the underwritten portfolio to changes in market conditions, since inception of the agreements. These ensure satisfactory coverage of assets' projected valuations to their underwritten values. Where risks are identified, strategies are developed to manage the risk position of the particular assets and provision is made for such potential loss. Where potential losses are identified, these are recognised as an adjustment to profitability at a contract level. Provision is made to the extent that the carrying values of leased assets are impaired through residual values not being fully recoverable.

Uncertainties that affect the group's estimate of the residual value of the leased assets include:

- return-rates of lease vehicles;
- penetration rates;
- lease duration; and
- market conditions.

The residual value risk provision is raised for the potential loss on the leased assets returned under a buy-back scheme.

	2024 R mil	2023 R mil
Financial liabilities subject to residual value risk		
Residual value provision	37	31

Price risk sensitivity analysis

The following table demonstrates the sensitivity to a reasonable possible change in the above mentioned residual values, with all other variables held constant, on the profit before taxation:

	2024		2023	
	Increase R mil	Decrease R mil	Increase R mil	Decrease R mil
Increase or decrease in residual values with 10%				
Impact on profit before taxation and equity	4	(4)	3	(3)

32.3.4.4 Commodity price risk

The group is exposed to the risk of changes in commodity prices in connection with procuring raw materials and manufacturing supplies used in production. A small portion of the raw material price risk, primarily relating to forecasted procurement of certain precious metals, is mitigated with the use of derivative financial instruments, if applicable.

Mercedes-Benz South Africa Limited

(Registration number 1962/000271/06)

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

33. Fair value information

Financial assets and liabilities carried at fair value	2024			2023		
	Carrying value R mil	Fair value R mil	Fair value level	Carrying value R mil	Fair value R mil	Fair value level
Interest-bearing borrowings	(7 542)	(7 563)	Level 2	(12 227)	(12 325)	Level 2

Category of financial asset or liability	Includes	Valuation techniques and material inputs used
Financial assets and derivatives	Commodity swap contracts	The fair values of commodity hedging contracts (e.g. commodity forwards) are determined on the basis of current reference prices with consideration of forward premiums and discounts.
Interest-bearing borrowings	Bonds issued under MBSA DMTN Programme	The bond programme is listed on the JSE. The bonds are held to term and are issued at market related rates of interest. Discounting based methodology is used for the valuation of the bond portfolio. Future cash flows are calculated using the projected forward JIBAR 3 month rates obtained from the JIBAR accrual zero rate curve. The projected cash flows are discounted using credit risk adjusted JSE rate curves.

Fair value hierarchy

The group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Other techniques for which all Inputs which have a material effect on the recorded fair value are observable, either directly or indirectly.

Level 3: Techniques which use inputs which have a material effect on the recorded fair value that are not based on observable market data.

34. Going concern

The consolidated financial statements for the year ended 31 December 2024 have been prepared on a going concern basis, which assumes that the group will be able to meet its obligations for the foreseeable future and for at least 12 months from the date of this report. The group recognised a net profit after tax of R 2 783 million (2023: R 4 447 million) for the year ended 31 December 2024 and, at that date, had an equity-to-asset ratio of 47.84% (2023: 42.69%).

Management believes that the group will be able to meet all its obligations for at least the next 12 months from the date of this report. Management further believes that, proceeds received during 2025 will be sufficient to meet the repayment requirements. Management has performed forecasts and based on these forecasts the expectation is that the group will continue to be profitable for the 2025 financial year. The company and group will therefore be solvent and liquid for at least the 12 months from the date of this report.

Management has the full support of the holding company, MBAG, for its operations. This is reviewed annually and additional support is provided, if required. To this extent, MBGAG issued a guarantee with regards to the notes issued under the DMTN programme.

35. Re-presentations

The consolidated statement of financial position has been amended to present from an order of liquidity to a current/non-current classification format. This change was made to be consistent with the presentation and disclosure of the consolidated MBAG group financial statements published by the ultimate holding company (incorporated in Germany), which is considered a more relevant and reliable presentation.

Furthermore, the group re-presented the cash flows from operating activities from an indirect method to direct method to ensure the consistency of the presentation of the consolidated statement of cash flows.

36. Restatements

In 2024, MBSA reviewed its contract manufacturing process to ensure compliance with IFRS 15. MBSA sells coated monoliths to a supplier, who processes it into catalytic converters and sells them back to MBSA. Since the supplier does not gain control of the monoliths, MBSA cannot recognise revenue, and the corresponding cost of goods sold, from these sales. The error was corrected by reducing the prior year revenue balance of R 74 932 million by R 1 655 million to R 73 277 million and reducing the cost of goods sold balance of R 66 118 million to R 64 453 million with the same amount.

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

36. Restatements (continued)

This adjustment does not affect the statement of financial position, operating profit (EBIT), net profit or the net cash and cash equivalents on the statement of cash flows.

The aggregation and presentation of lease liability together with trade and other payables as a separate financial statement line item constitute a prior period error, as these items are of a dissimilar nature and should therefore not have been aggregated together. The current year lease liabilities balance is now separately presented on the consolidated statement of financial position, and the prior year amounts are restated to align with the disclosure requirements.

The restatement has no effect on the measurement of operating profit, profit for the year or total liabilities.

The correction of the error resulted in adjustments as follows:

Statement of profit or loss and other comprehensive income - 2023

	As previously reported R mil	Restatement R mil	Restated R mil
Revenue	74 932	(1 655)	73 277
Cost of goods sold	(66 118)	1 655	(64 463)
Gross profit from sale of vehicles and related services	8 814	-	8 814

Statement of financial position - 2023

Lease liabilities	-	344	344
- Current liabilities	-	70	70
- Non-current liabilities	-	274	274
Trade and other payables	4 026	(344)	3 682

Statement of financial position - 2022

Lease liabilities	-	402	402
- Current liabilities	-	71	71
- Non-current liabilities	-	331	331
Trade and other payables	4 224	(402)	3 822

The following reconciliation demonstrates the transition from the prior year's restated value for cash received from customers using the indirect method to the cash inflows from the sale of vehicles and related services using the direct method.

Statement of cash flows - cash flows from operating activities

	As previously reported 2023 R mil	Restatement R mil	Restated 2023 R mil
Cash flows from the sale of vehicles and related services			
Cash received from customers before changes in operating assets and liabilities	74 546	(1 655)	72 891
<i>Changes in operating assets and liabilities</i>			
Decrease in trade and other receivables	454	-	454
Increase in amounts receivable from group companies	(1 604)	-	(1 604)
Increase in contract liabilities	762	-	762
Cash received from customers	74 158	(1 655)	72 503

Mercedes-Benz South Africa Limited

Consolidated Financial Statements for the year ended 31 December 2024

Notes to the Consolidated Financial Statements

36. Restatements (continued)

Cash flows from the sale of vehicles and related services consist of the following:

Cash flows from the sale of vehicles and related services

	Restated 2023 R mil
Cash received from customers	72 503
Effect of exchange rate on cash and cash equivalents	(53)
Non-interest revenue	748
Decrease in loans and advances to customers	430
Cash inflows from the sale of vehicles and related services	73 628

The following reconciliation demonstrates the transition from the prior year's restated value for cash paid to suppliers and employees using the indirect method to the cash paid to suppliers using the direct method.

Statement of cash flows - cash flows from operating activities

	As previously reported 2023 R mil	Restatement R mil	Restated 2023 R mil
Cash paid to suppliers and employees before changes in operating asset and liabilities	(67 515)	1 655	(65 860)
<i>Changes in operating assets and liabilities</i>			
Decrease in inventories	627	-	627
Decrease in trade and other payables	(92)	-	(92)
Decrease in amounts payable to group companies	(775)	-	(775)
Cash paid to suppliers and employees	(67 755)	1 655	(66 100)

Cash paid to suppliers consists of the following:

Cash paid to suppliers

	Restated 2023 R mil
Cash paid to suppliers and employees	(66 100)
Cash paid to employees	2 614
Non-interest expenditure	(332)
Cash paid to suppliers	(63 818)

37. Events after the reporting period

At the date of finalisation of the financial statements there were no material events that occurred subsequent to the reporting date that required adjustments to the amounts recognised in the financial statements.

Bonds and bank loans issued and redeemed

Subsequent to year end, no bonds and bank loans have been issued.

American tariffs

In April 2025, the USA announced new tariffs on goods imported from outside the USA, including vehicle imports. MBSA operates a manufacturing plant producing C-Class models for the global market, including the USA, is actively assessing the potential effects of these tariffs on the business. The current assessment is ongoing, with efforts being coordinated both locally and by the holding company, MBAG.

As at the reporting date, it is not possible to quantify the financial impact of these tariffs.

Director changes

Mrs S Sardien resigned with effect from 30 April 2025 and Mr F Seidler was appointed with effect from 1 May 2025.

Notes to the Consolidated Financial Statements

38. New Standards and Interpretations

Standards and interpretations not yet effective

The company has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the company's accounting periods beginning on or after 01 January 2025 or later periods:

Accounting standard	Effective date - on or after	Description of change	Description of impact
IFRS 19 <i>Subsidiaries without Public Accountability</i>	1 January 2027	Disclosure for Subsidiaries without Public Accountability IFRS 19 permits eligible subsidiaries to use IFRS® Accounting Standards with reduced disclosures. This will reduce the costs of preparing subsidiaries' financial statements while maintaining the usefulness of the information for users of their financial statements.	Subsidiaries are eligible to apply IFRS 19 if they do not have public accountability and their parent company applies IFRS® Accounting Standards in their consolidated financial statements.
IFRS 18 <i>Presentation and Disclosure in Financial statements</i>	1 January 2027	Presentation and Disclosure in Financial statements The amendment introduces improvements to reporting of financial performance to provide investors a better basis for analysing and comparing companies: Improved comparability in the statement of profit or loss (income statement) through three categories for income and expenses: — operating, investing and financing — improving the structure of the income statement, and — a requirement for new defined subtotals.	Enhanced transparency of management defined performance measures with a requirement to disclose explanations of those measures related to the income statement. Useful grouping of information in the financial statements through guidance on organising information and providing it in the primary financial statements or the notes, as well as a requirement to provide more transparency about operating expenses. IFRS 18 replaces IAS 1 Presentation of Financial Statements
IFRS 7 Financial Instruments: Disclosures and IFRS 9 Financial Instruments	1 January 2026	Classification and measurement of financial instruments Amendments to IFRS 7 introduce additional disclosure to enhance transparency for investors regarding investments in equity instruments designated at fair value through OCI and financial instruments with contingent features - tied to environmental, social and corporate governance ("ESG")-linked targets. Amendments to IFRS 9 address diversity in accounting practice by making the classification and measurement requirements more understandable and consistent by clarifying the: — classification of financial assets with ESG and similar features; and — date on which a financial asset or financial liability is derecognised when a liability is settled through electronic payment systems. These amendments also introduce an accounting policy option to allow a company to derecognise a financial liability before it delivers cash on the settlement date if specified criteria are met.	The amendment does not have any material impact on the company's profitability, liquidity and capital resources and financial position.
IAS 21 <i>The Effects of Changes in Foreign Exchange Rates</i>	1 January 2025	Lack of Exchangeability The amendments require an entity to apply a consistent approach to assessing whether a currency is exchangeable into another currency and, when it is not, to determining the exchange rate to use and the disclosures to provide.	The amendment does not have any material impact on the company's profitability, liquidity and capital resources and financial position.
